

# Developmental Milestones

Last Modified on 08/13/2021 3:36 pm EDT

Version 14.19

This window map article points out some of the important aspects of the window you're working with in OP but is not intended to be instructional. To learn about topics related to using this window, see the **Related Articles** section at the bottom of this page.

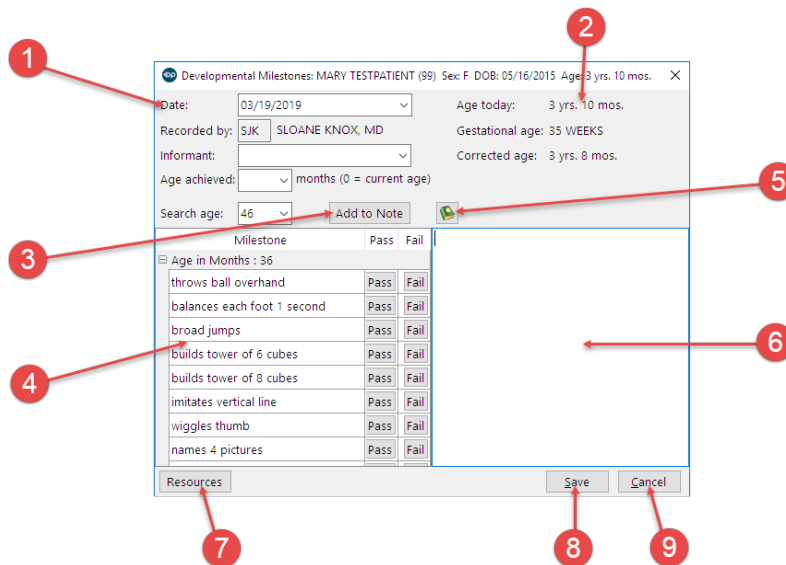

## About Developmental Milestones

**Path: Clinical, Practice Management or Billing tab > Patient Chart button > Development > Narrative or Graphical tab > New button**

The Developmental Milestones window applies narrative or graphical milestones to a patient's chart. There are two Developmental Milestone windows:

- Developmental Milestones (Narrative)
- Developmental Milestones (Graphical)

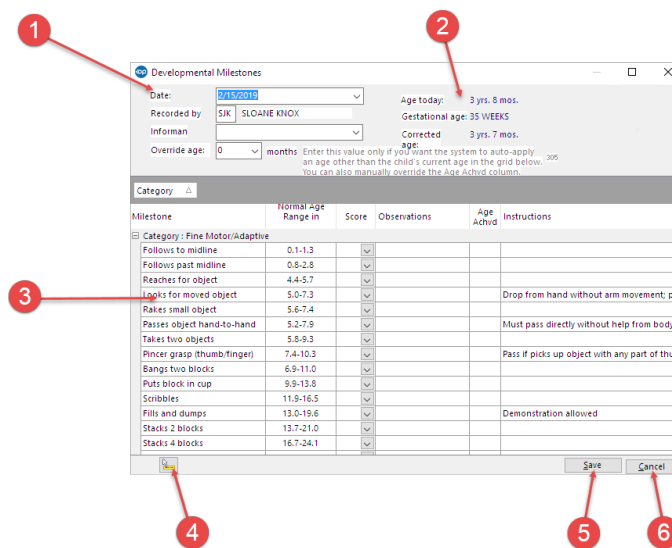

## Developmental Milestones (Narrative) Map

Number	Section	Description
1	Inform Fields	The Inform fields set the following milestone information: date, recorded by (examiner), informant (parent, guardian, etc.), age milestone was achieved, and the milestone age search.
2	Patient Age Comparison	The Patient Age Comparison displays the patient's age, gestational age, and corrected age.
3	Add to Note button	The <b>Add to Note</b> button adds a Developmental Milestone note. It begins the note with the patient's age and the informant about the milestone.

4	Milestone List	The Milestone List displays the Milestones to be achieved by the patient. Milestones are categorized by age.
5	Phrase Construction button	The <b>Phrase Construction</b> button access the Phrase Construction window to find a phrase for the Milestone Note description.
6	Milestone Note	The Milestone Note displays the Milestone Note as it is being created.
7	Resources button	The <b>Resources</b> button provides web access to information on various categories.
8	Save button	The <b>Save</b> button saves the Milestone note and applies it to the Narrative Milestone list in the Development Evaluation window.
9	Cancel button	The <b>Cancel</b> button cancels the Developmental note and closes the Developmental Milestone window.

## Developmental Milestones (Graphical) Map

Number	Section	Description
1	Inform Fields	The Inform fields set the following milestone information: date, recorded by (examiner), informant, and Override age. Enter the override age value only if you want the system to auto-apply an age other than the child's current age.
2	Patient Age Comparison	The Patient Age Comparison displays the patient's age, gestational age, and corrected age.
3	Milestone List grid	The Milestone List grid lists the milestones and age the milestone is normally achieved. The evaluation score can be set along with any observations and instructions in this grid.
4	Links button	The <b>Links</b> button provides web access to information on various categories.
5	Save button	The <b>Save</b> button saves the Milestone note and applies it to the Narrative Milestone list in the Development Evaluation window.
6	Cancel button	The <b>Cancel</b> button cancels the Developmental note and closes the Developmental Milestone window.
