Last Modified on 04/01/2024 11:14 am EDT

OP sets **all defaults to share all information** Any individual decisions by Practice-users to restrict information sharing (access, use, or exchange) are the responsibility of the Practice in the implementation of its 21st Century Cures Act Information Blocking policies and procedures for its Practice and patients.

Version 21.3

The following table is a detailed list of available user permissions and their definitions. Permissions that do not appear in this table but are displayed in the **Security Settings** window in OP have been deprecated or replaced with a permission in this table. For a simple way to see what permissions each staff member is assigned, an SQL query can be used. To access the SQL, click here

Tip: To quickly search this table, use the Filter and Sort options. Java must be enabled in order to use these capabilities.

- Filter: Enter specific keywords (or a character string) in the filter bar. As you enter characters in the filter bar, the rows not containing those characters will become hidden. The visible rows display based upon the characters in the row that match the characters in the filter bar. Do not use commas to separate keywords.
- Sort: Click one of the column headers to sort A-Z or Z-A.
