

Application/Interbase Status Information

Last Modified on 07/30/2021 1:39 pm EDT

Version 14.19

There is no window associated with this window map for OP 20.

Version 14.10

About Application/Interbase Status Information

Path: Help Menu > Application Status (Keyboard Shortcut keys: [Alt][H][S])

The Application/Interbase Status window shows the status for database elements in OP. Information includes the name of the element, class, connections, transactions, datasets, statements, data sources, and last refresh. Click the **Refresh** button to refresh the status information.

E: <u>Sourness</u> B: [DataModules] B: [DataModules] B: [Connections] B: [Transactions] B: [Statements]	Property	Data	
	Name	_nil_	
	Connections	5 (Connected=2)	
	Transactions	19 (Started=2) OAT=0:0:50	
	Datasets	223 (Active=2) Max_Buffer=1	
	Statements	10 (Active=0)	
	DataSources	0 (Data Links=0)	
	Forms	7 (Visible=2)	
	DataModules	8	
	Last Refresh	08/09/2017 10:45 AM	
	Default Session	\$06159AF0 (IBO_DefaultSession)	
	Session Connections	3	
	Session Transaction	14	
	Session Datasets	100	
	Session Statements	9	
	Session DataSource	0	
	Session Data Links	0	
	IBObjects Version	4.9.14 55	
	Compiler	Delphi and C++ Builder v2006	
	Compiler	Delphi and C++ Builder v2007
