

Immunization Quick Entry Chart

Last Modified on 08/24/2021 9:07 am EDT

Version 14.19

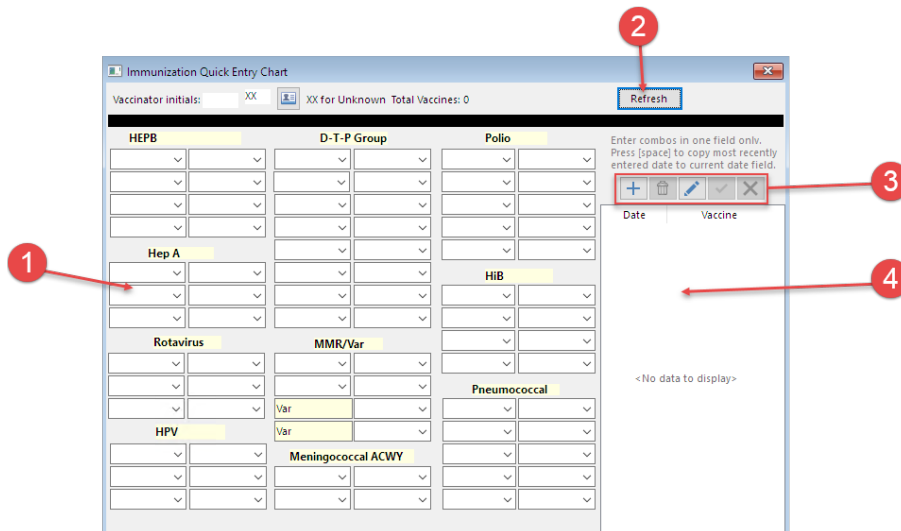

This window map article points out some of the important aspects of the window you're working with in OP but is not intended to be instructional. To learn about topics related to using this window, see the **Related Articles** section at the bottom of this page.

About Immunization Quick Entry Chart

Path: Clinical, Practice Management, or Billing tab > Patient Chart button > Immunizations > Quick Entry button

The Immunization Quick Entry Chart provides vaccine documentation when it is necessary to update a vaccine administered outside the office or prior to the vaccine inventory being used to document vaccines given by the practice.

Immunization Quick Entry Chart Map

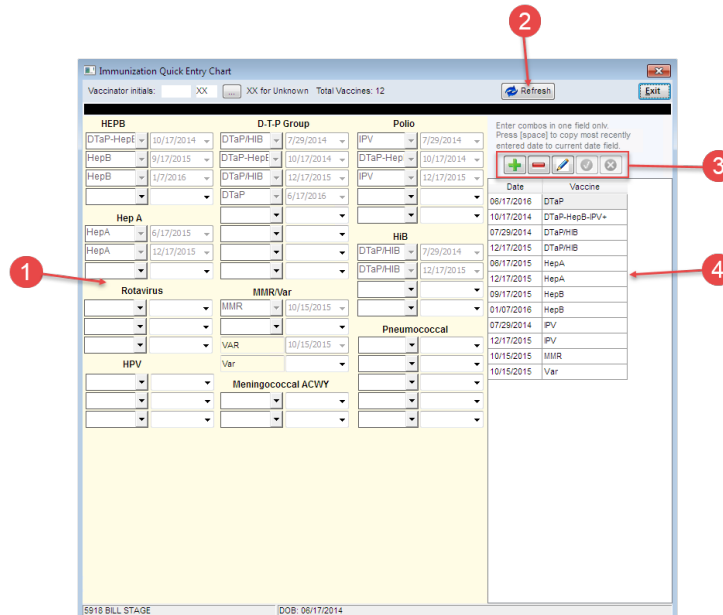

Number	Section	Description
1	Vaccine grid	The vaccine grid selects individual or combination vaccines. Combination vaccines only need to be entered in one of the component fields. Refresh the screen to automatically update the other component fields of the combination vaccine. You can automatically copy the last date entered by pressing the spacebar. Enter the date when the vaccine was removed from inventory and administered.
2	Refresh button	The Refresh button updates the vaccine fields.
3	Function buttons	The function buttons insert a record, delete a record, edit a record, saves an edit, and cancel an edit.
4	Vaccine List	Vaccines can be entered from the vaccine grid or the vaccine list. Not all vaccines are listed under the vaccine category. If you cannot find the vaccine, enter the required information in the list at the right of the window.
