Version 14.19

> This window map article points out some of the important aspects of the window you're working with in OP but is not intended to be instructional. To learn about topics related to using this window, see the **Related Articles** section at the bottom of this page.
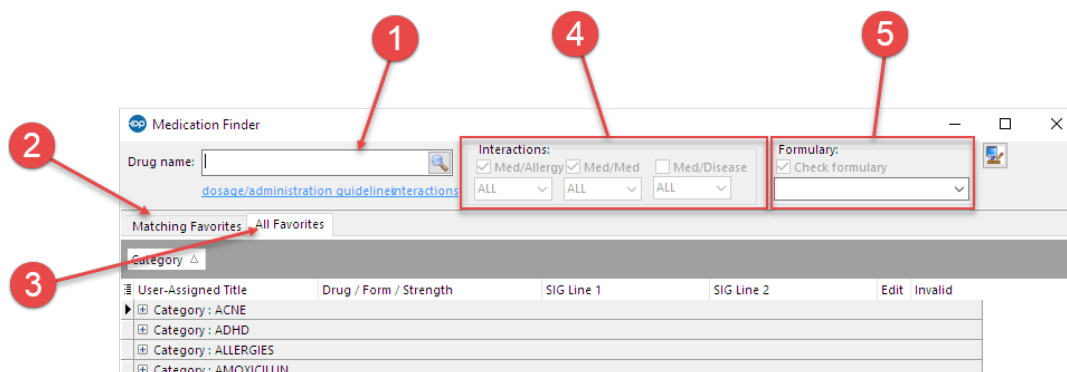

About Medication Finder

> **Path: Clinical, Practice Management or Billing tab > Patient Chart button > Medications > New button > Ellipsis button (...) in Drug field**

> **Path: Clinical tab > Medication Favorites button**

The Medication Finder locates medications. Using the Medication Finder you can:

- View medications on the All Favorites tab.
- View medications on the Matching Favorites or Master List tabs if the drug name was entered in the Drug Name field.
- Delete a medication from the All Favorites tab.
- Edit a medication from the All Favorites tab.

Medication Finder Map

| Number	Section	Description
1	Drug Name search bar	The Drug Name search bar locates the medication by typing in the drug name (up to 35 characters). It is suggested to type at least 4 to 5 letters.
2	Matching Favorites tab	The Matching Favorites tab displays the medication search results in the medication grid.
3	All Favorites tab	The All Favorites tab displays all the medications marked as a favorite on the Prescription Writer window. Medications are grouped by category.
4	Interactions	When prescribing a medication, checking interactions will occur depending on which checkboxes are selected. For additional information on where the interaction preferences are set, click **here**.
5	Formulary	When prescribing a medication, formulary checking can occur if the Check formulary checkbox is selected. For additional information on where the formulary checking

| | | preference is set, click **here**. |
