Version 20.17

This window map article points out some of the important aspects of the window you're working with in OP but is not intended to be instructional. To learn about topics related to using this window, see the **Related Articles** section at the bottom of this page.

About Problem List

> **Path: Clinical, Practice Management, or Billing tab > Patient Chart button > History > (select category) > New button**

The Problem List creates or edits problems for the patient's past medical history. Visibility for this note can be set in the Problem List window.

Problem List Map

| Number	Section	Description

1	Note tab	The **Note** tab creates the Problem List note. This note can be a general note, historical note, or a review of systems note. The Problem List location section of the Note tab helps to determine the subsection location for the problem in the Problem List. You can indicate the onset date and resolution date. You can also indicate if the problem is active, being tracked, or resolved. The problem details section of the Note tab indicates the problem and ICD code, stage, symptoms, and quality of life. Any notes are indicated below the problem.
2	Chart Review tab	The **Chart** Review tab lists the problems for that patient. Here, the Provider can view the progress notes, diagnoses, date of diagnosis, provider, and more.
3	Audit Trail tab	Using the **Audit Trail** tab as an Administrator, you can see what changes were made to the Problem List and by whom.
4	Symptoms/severity	The **Symptoms/severity** ellipsis button displays the Symptoms window where you can add, edit and delete symptoms and the associated severity.
5	Notes	The **Notes** field allows you to add any pertinent information. You can also use the Phrase Construction button to find a phrase for the description.
