

Vaccine Code Table Details

Last Modified on 12/10/2021 4:13 pm EST

Version 20.15

This window map article points out some of the important aspects of the window you're working with in OP but is not intended to be instructional. To learn about topics related to using this window, see the **Related Articles** section at the bottom of this page.

About Vaccine Code Table Details

Path: Practice Management tab > More button (Reference Data group) > Vaccine Products button

The Vaccine Code Table Details window edits the details for a vaccine code in the Vaccine Code table. You can enter your new changes or utilize the dropdown arrow to select the populated vaccine code list.

The screenshot shows the 'Vaccine Code Table Details' window. Callout 1 points to the 'Vaccine name' field containing 'FLU - 6-35m pf'. Callout 2 points to the 'Inventory name' field containing 'FLU6M+PF'. Callout 3 points to the 'Archived (out of production or no longer used)' checkbox, which is checked. Callout 4 points to the table below the form, which has columns for 'Product Description', 'GTIN', and 'NDCID'. The table contains one row: 'Fluzone pf 2011-12, 6-35 months', '00349281111259', and '49281011125'. Callout 5 points to the 'Save' button and callout 6 points to the 'Cancel' button.

Vaccine Code Table Details Map

Number	Section	Description
1	Vaccine Name	The Vaccine Name indicates the vaccine associated with the vaccine code. To ensure consistent forecasting, the vaccine name cannot be changed. Only the Inventory Name can be modified.
2	Vaccine Code Details	The Vaccine Code Details contain all modifiable fields in the Vaccine Code Table Details window.
3	Archived checkbox	Select the Archived checkbox when the selected vaccine is out of production and no longer in use. When archiving a vaccine, make sure it is not a vaccine that you would document. If a new patient comes to your practice and the vaccine quick entry chart is used to update their shot record, then the vaccine will not be available to document if it is archived.

4	Vaccine GTIN and NDC records	The Vaccine GTIN and NDC records associate the vaccine global trade item number with its national drug code number. The Vaccine GTIN and NDC records can be added, removed, and modified.
5	Save button	The Save button saves the changes and closes the Vaccine Code Table Details window.
6	Cancel button	The Cancel button closes the Vaccine Code Table Details window without saving any changes.
