> **Important Content Update Message**
> We are currently updating the OP Help Center content for the release of OP 20. OP 20 (official version 20.0.x) is the certified, 2015 Edition, version of the Office Practicum software. This is displayed in your software (**Help tab > About**) and in the Help Center tab labeled Version 20.0. We appreciate your patience as we continue to update all of our content.

Cross Mapping SNOMED Codes

Last Modified on 11/18/2019 3:42 pm EST

Version 14.19

> ## Path: Clinical or Billing tab > Diagnosis Codes

Overview

The cross-mapping of diagnoses allows users to map a single diagnosis to multiple methodologies. For example, matching ICD-10 codes to lateral SNOMED coding. SNOMED mapping can be completed in the Diagnostic Code Editor window, in **Visit Templates**, and in the Assessment section of a visit note.

Cross-Mapping Diagnosis Codes

1. Navigate to the Diagnosis Code Management window by following the path above.
2. Search for the diagnosis code to map:
    a. Enter the search criteria (Code or Description).
    b. Select the correct **Result Set** radio button.
    c. Click the **Search** button.
3. Select the code to map.
4. Click the **Edit** button. The Diagnostic Code Editor window is displayed.
5. Click the **Cross Mappings** tab.
6. Complete the mapping:
    a. Click in the **Mapped Code Set** field.
    b. Use the drop-down menu to select the appropriate code set for which you will map to.
    c. Click the **SNOMED Search** button . A list of the matching mapped code fitting the description are displayed.
    d. Select the appropriate code or click the **Full Search** button to search for further results.
7. Click the **Save** button to retain your changes.

Version 14.10

Overview

Cross Mapping Diagnosis allows users to map a single diagnosis to multiple methodologies (Example:Matching ICD10 to lateral SNOMED coding).

Cross Mapping Diagnosis Codes

1. Open the Diagnosis Code Management Window. Begin by searching for the code. Enter the search criteria (Code or Description). Be sure to select the correct Result Set based on criteria.

   - To confirm this is the correct Diagnosis Code, consult your most up to date coding book.

2. When you have located the code and are ready to add the **Cross Mapping**, click on the **Edit** button .

Diagnosis Code Management

3. Click on the tab **Cross Mappings**.
4. Click the down arrow underneath the column titled **Mapped Code Set.** Choose the appropriate code type and the Description/Synonym will auto populate.
5. Click on the **Identify** button 🗺️ .
6. This will return a list of the matching Mapped Code set options that fit the description. Click on the one you want.
7. Click **Save** to retain your changes.
