- Order/Workflow: Other Tasks
- Synagis injection (dose based on weight 15 mg/kg) you will set this as a standing order
- CPT and Dx codes will auto populate when the vaccine is given

Version 14.10

Documenting Synagis

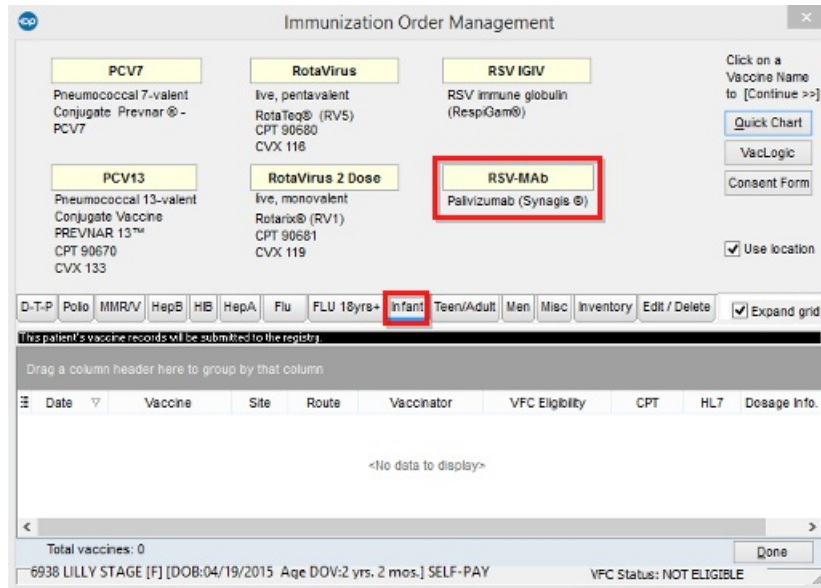

The video below will inform you on our Best Practice to create a Synagis template and how to document Synagis given when your patient comes into the office.

Documenting Synagis

Synagis most likely will not be in your inventory.

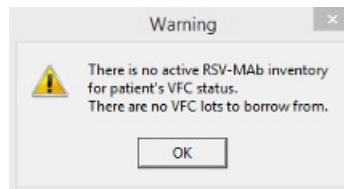

Follow the steps below:

1. From the patient chart click on  then click on .
2. Select the infant tab and then select the Synagis vaccine.

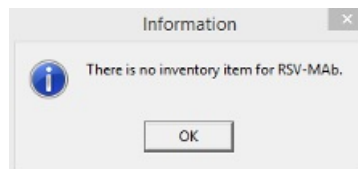

The screenshot shows the 'Immunization Order Management' interface. It features several vaccine selection buttons: PCV7, RotaVirus, RSV IGIV, PCV13, RotaVirus 2 Dose, and RSV-MAB. The 'RSV-MAB' button is highlighted with a red box. Below these buttons is a filter bar with categories like 'D-T-P', 'Polio', 'MMR/V', 'HepB', 'HIB', 'HepA', 'Flu', 'FLU 18yrs+', 'Infant', 'Teen/Adult', 'Men', 'Misc', 'Inventory', 'Edit / Delete'. The 'Infant' category is selected and highlighted with a red box. A table below the filter bar shows columns for Date, Vaccine, Site, Route, Vaccinator, VFC Eligibility, CPT, HL7, and Dosage Info. The table is currently empty, displaying '<No data to display>'. At the bottom, there are buttons for 'Total vaccines: 0' and 'Done', and patient information: '6938 LILLY STAGE [F] [DOB:04/19/2015 Age DOV:2 yrs. 2 mos.] SELF-PAY' and 'VFC Status: NOT ELIGIBLE'.

3. You will get the following pop up box. Click ok

The screenshot shows a 'Warning' dialog box with a yellow warning icon. The text inside reads: 'There is no active RSV-MAb inventory for patient's VFC status. There are no VFC lots to borrow from.' There is an 'OK' button at the bottom.

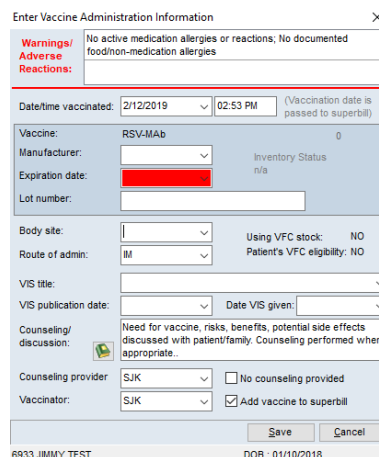

4. You will get another pop up stating that there is no inventory in stock. Click OK.

The screenshot shows an 'Information' dialog box with a blue information icon. The text inside reads: 'There is no inventory item for RSV-MAb.' There is an 'OK' button at the bottom.

5. Click on the **Continue without Lot Information** button.

6. Enter in all vaccine information. The vaccinator will populate with your initials since you are logged into OP.

The screenshot shows the 'Enter Vaccine Administration Information' form. It includes a 'Warnings/Adverse Reactions' section with a text area containing 'No active medication allergies or reactions; No documented food/non-medication allergies'. Below this are fields for 'Date/time vaccinated' (2/12/2019, 02:53 PM) and 'Vaccine' (RSV-MAb). The 'Manufacturer' dropdown is set to 'Inventory Status: 0'. The 'Expiration date' field is redacted with a red box. The 'Lot number' field is empty. The 'Body site' dropdown is set to 'Using VFC stock: NO'. The 'Route of admin' dropdown is set to 'Patient's VFC eligibility: NO'. The 'VIS title' dropdown is empty. The 'Date VIS given' dropdown is empty. The 'Counseling/discussion' section has a text area with 'Need for vaccine, risks, benefits, potential side effects discussed with patient/family. Counseling performed where appropriate.' The 'Counseling provider' dropdown is set to 'SJK' and 'No counseling provided' is unchecked. The 'Vaccinator' dropdown is set to 'SJK' and 'Add vaccine to superbill' is checked. At the bottom, there are 'Save' and 'Cancel' buttons. The patient information at the bottom reads: '6933 JIMMY TEST' and 'DOB : 01/10/2018'.

7. Click on **Save**.

You may build a Synagis template:

- CC: Here for Synagis administration
- ROS: Denies Fever/chills, Denies allergic reaction to prior Synagis administrations
- Order/Workflow: Other Tasks
- Synagis injection (dose based on weight 15 mg/kg) you will set this as a standing order
- CPT and Dx codes will auto populate when the vaccine is given
