We are currently updating the OP Help Center content for the release of OP 20. We appreciate your patience as we continue to update all of our content. To locate the version of your software, navigate to: **Help tab > About**.

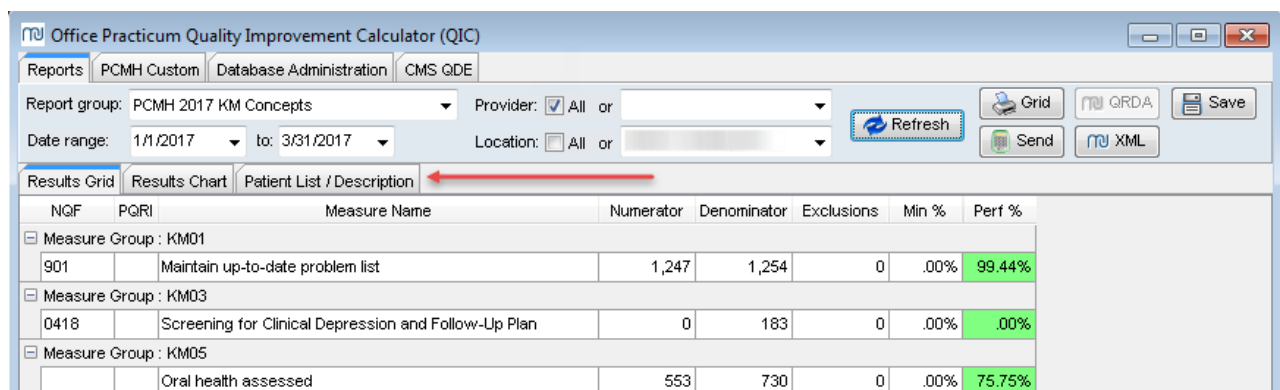

Interpreting Medical Home Results (Reports Tab) 2017

Last Modified on 05/22/2020 10:50 am EDT

Version 14.19

There are four tabs on top: Reports, PCMH Custom, Database Administration, and CMS QDE. When opening the QIC Module it defaults to the Reports tab.

The results will be displayed differently in each of the three additional tabs as highlighted with the red arrow: Results Grid, Results Chart, Patient List/Description.

NQF	PGIRI	Measure Name	Numerator	Denominator	Exclusions	Min %	Perf %
Measure Group : KM01							
901		Maintain up-to-date problem list	1,247	1,254	0	.00%	99.44%
Measure Group : KM03							
0418		Screening for Clinical Depression and Follow-Up Plan	0	183	0	.00%	.00%
Measure Group : KM05							
		Oral health assessed	553	730	0	.00%	75.75%

Results Grid:

Each measure is listed vertically with a corresponding numerator and denominator. Please refer to the [NQF website](#) for complete details on the NQF Measure Name. The column labeled 'Min %' represents the minimum threshold defined by NCQA in the 2017 PCMH Standards. The last column labeled 'Perf %' represents your actual performance during the reporting period selected as a percentage.

Green: Meets minimum threshold.

Red: Does not meet minimum threshold.

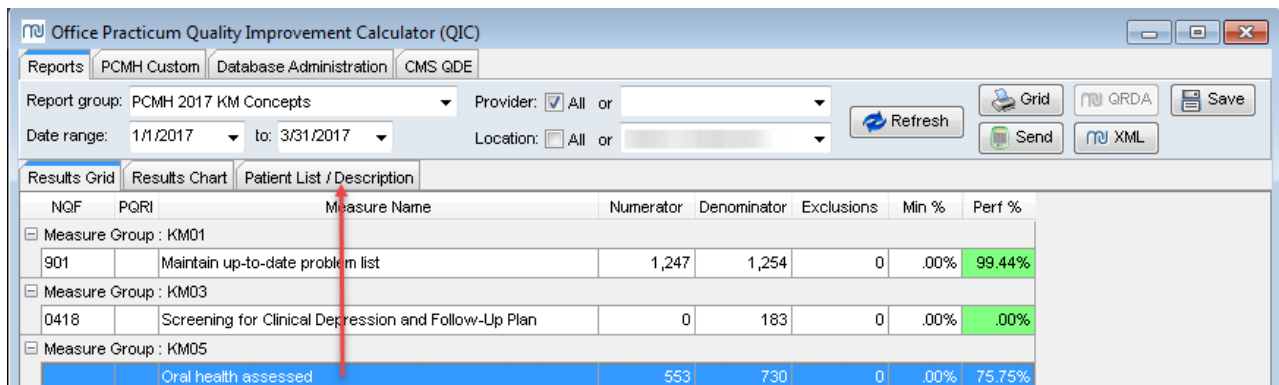

Results Chart:

By clicking on the Results Chart tab you can view a graphical representation.

Each of the measures from this standard in the report bundle are displayed in a bar graph format as a percentage. The small yellow triangle represents the minimum threshold as defined by the accrediting organization.

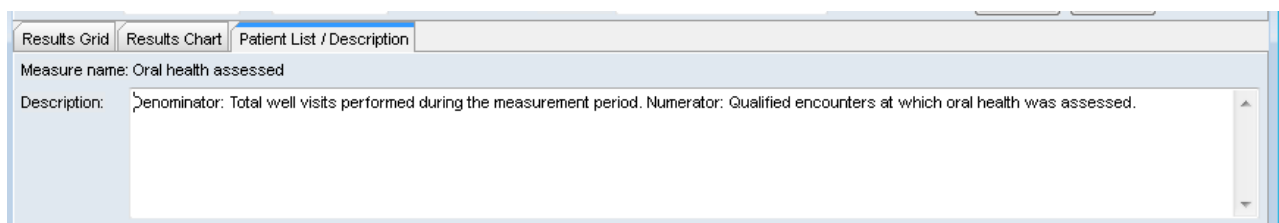

Patient List/Description:

From the Results Grid, click on the measure you would like to drill down on, then click on the Patient/List Description tab.

NQF	PQRI	Measure Name	Numerator	Denominator	Exclusions	Min %	Perf %
Measure Group : KM01							
901		Maintain up-to-date problem list	1,247	1,254	0	.00%	99.44%
Measure Group : KM03							
0418		Screening for Clinical Depression and Follow-Up Plan	0	183	0	.00%	.00%
Measure Group : KM05							
		Oral health assessed	553	730	0	.00%	75.75%

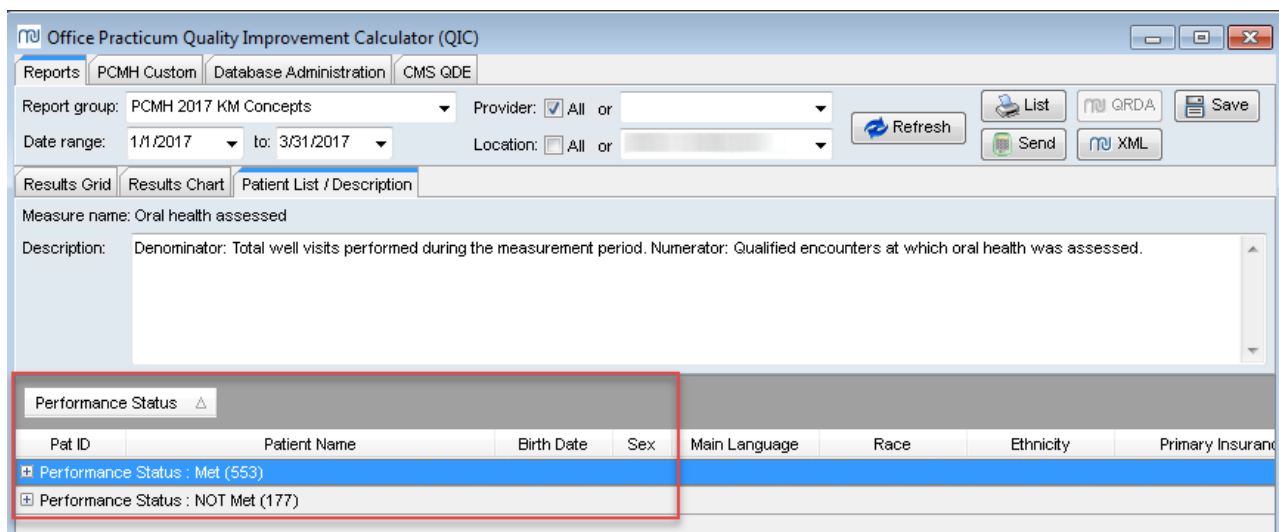

A description box will appear. It will describe the numerator and denominator with which the calculation is made. It will also reference the data points within Office Practicum that drives the calculation.

Measure name: Oral health assessed

Description: Denominator: Total well visits performed during the measurement period. Numerator: Qualified encounters at which oral health was assessed.

Below the description there is a performance status area where you can drill down and show the patients who have met and not met the measure. There will be some measures that are not based on individual patients and for these measures you will not have list of patients.

Measure name: Oral health assessed

Description: Denominator: Total well visits performed during the measurement period. Numerator: Qualified encounters at which oral health was assessed.

Performance Status: ▲

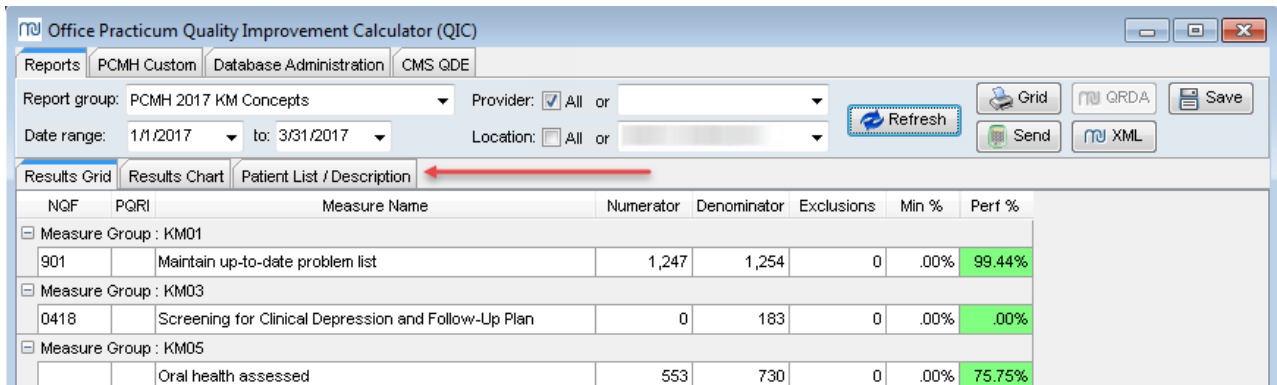

Pat ID	Patient Name	Birth Date	Sex	Main Language	Race	Ethnicity	Primary Insurance
+ Performance Status : Met (553)							
+ Performance Status : NOT Met (177)							

Version 14.10

There are four tabs on top: Reports, PCMH Custom, Database Administration, and CMS QDE. When opening the QIC Module it

defaults to the Reports tab.

The results will be displayed differently in each of the three additional tabs as highlighted with the red arrow: Results Grid, Results Chart, Patient List/Description.

NQF	PQRI	Measure Name	Numerator	Denominator	Exclusions	Min %	Perf %
Measure Group : KM01							
901		Maintain up-to-date problem list	1,247	1,254	0	.00%	99.44%
