
Do nurses need to enter rendering provider on visit info tab for every visit?

Last Modified on 01/03/2018 12:01 pm EST

Nurses/MA's do not need to choose a rendering provider for each visit. When the provider logs into the note that was started by the nurse for the first time, OP will automatically enter them as the rendering provider. If the provider who logs in is not the provider whose schedule the appointment has been made, they will get the pop up asking them to claim the appointment.
