Proxy (Prescriber Agent)

A Proxy or Prescriber Agent is any individual who creates and transmits a prescription on behalf of a provider. Office Practicum supports the use of Prescriber Agents to prescribe or refill specific medications on behalf of a provider. To review the Proxy workflow in OP, [click here](#).

When a Proxy or Prescriber Agent prescribes a medication, Office Practicum adds that information to the eRx Summary. OP also sends this information to the pharmacy.

Patient	
Patient name	MARY TESTPATIENT
Sex / Birth date	F 5/16/1998

Medication	
Diagnosis	
Full drug name	Flovent HFA 44 mcg/actuation Aerosol With Adapter
Directions	Take 2 puffs by mouth once a day

City State Zip	Horsham PA 19044

Prescriber Agent	
Agent name	Jeff Agent
Phone #	555-555-5555

Send Edit Cancel

When a Proxy or Prescribing Agent selects a Prescriber who uses a Supervising Provider, OP automatically populates the Supervisor field in the Prescription Writer window with the Supervising Provider the prescriber selected the last time they sent a prescription.

Note: The Proxy or Prescribing Agent has the ability to edit the Supervisor field in the Prescription Writer window.

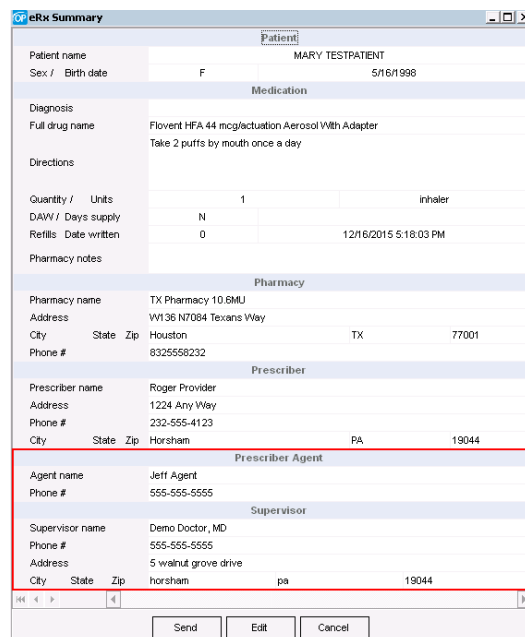

The screenshot shows the Prescription Writer window with a dropdown menu open for the Supervisor field. The dropdown lists the following options:

Init	Name
107	107 Demo Doctor, MD
102	102 Administrator
55	55 UNKNOWN TARDIS
1081	1081 One Test Prescr

The current selection in the dropdown is '55 ... UNKNOWN TARDIS'.

OP adds the Proxy or Prescriber Agent and the Supervising Provider to the eRx Summary.

The screenshot shows the eRx Summary window with the following information:

Patient: MARY TESTPATIENT, Sex: F, Birth date: 5/16/1998

Medication: Flovent HFA 44 mcg/actuation Aerosol With Adapter, Directions: Take 2 puffs by mouth once a day, Quantity: 1, Units: inhaler, DAW: N, Days supply: N, Refills: 0, Date written: 12/16/2015 5:18:03 PM
