

Important Content Update Message

We are currently updating the OP Help Center content for the release of OP 20. We appreciate your patience as we continue to update all of our content. To locate the version of your software, navigate to: **Help tab > About**.

EPCS Identity-Proofing Procedures

Last Modified on 05/26/2020 10:13 am EDT

Version 14.19

EPCS Identity-Proofing Procedures

The DrFirst Identity-Proofing (IDP) process is managed by **Experian** entirely online. The IDP process verifies identities using a combination of personal identity verification (such as confirming name, address, Social Security number, DEA number, date of birth), knowledge-based authentication (interactive questions designed to ensure an individual is who they claim to be), and verification of account information (generally a financial instrument such as a credit card number). The provider must also activate the token they receive and link it to their account.

Once you are contracted for EPCS, DrFirst sends written instructions by email about how to complete the IDP process. The email includes a link to initiate the process with Experian.

Note: The link to initiate the process expires after 30 days.

In addition, a hard token is shipped by USPS Priority Mail to the address on file for your practice. Another token can be provided upon request for an additional cost.

Note: Do not lose your hard token! You need this token to complete the IDP process and to generate a secure passcode each time you write a prescription for a controlled substance.

HARD TOKEN

You can see a size comparison of the Hard Token to a human hand in the image below.

In addition, providers can download a soft token to their smartphone, tablet or desktop. [Click here](#) to learn how to download the VIP Access soft token by Symantec to each device.

Note: The DEA requires that providers use a soft token on a device that is separate from the device they use for ePrescribing.

SOFT TOKEN (Free iPhone or Android app)

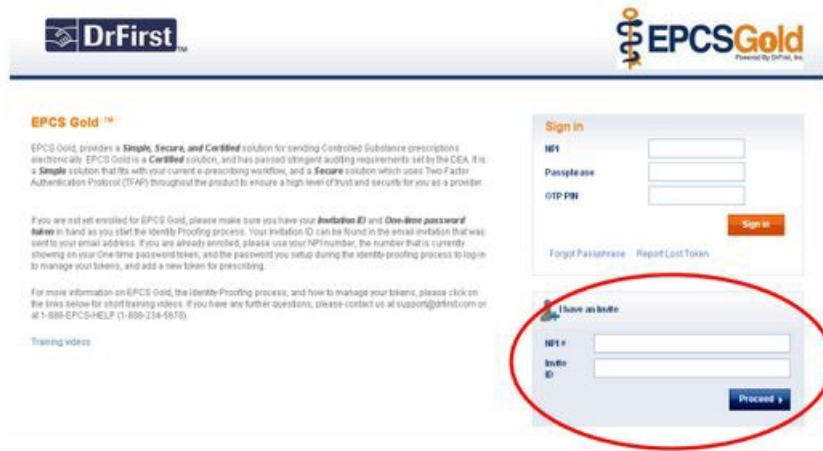

Note: Ensure that your provider(s) have a token while setting up their individual EPCS user account. Although the EPCS system allows them to set up their account without their token, the process ultimately fails and they are directed to restart.

As an alternative to a hard or soft token, Imprivata allows you to use biometric, two-factor authentication. To use Imprivata you must:

1. Upgrade to OneSign 5.0.
2. Add Confirm ID 1.0.
3. Have an Imprivata test server.
4. Install ActiveX controls on each workstation.

EPCS Gold communicates directly with the Imprivata agent software installed locally through the web browser by using ActiveX

controls. The Imprivata agent on the local computer is configured to then communicate to your site's own Imprivata server. To begin the IDP process, open the registration invite you received by email and click the **Link** to register. Your browser opens to the registration website. Enter your **NPI** and the **Invite ID** included in the email.

Select the **Checkbox** and click the **I Agree** button to accept the terms of use.

Next, check and acknowledge the prerequisites and click the **Continue** button.

The seven-step IDP process begins. The first step is User Registration. Enter all required **personal information**. Optionally, enter credit-card information to assist with accurately confirming your identity.

User Registration Fields marked with * are mandatory

1 2 3 4 5 6 7

MPN: 1922001973

First Name*: Teresa

Last Name*: Anderson-Kinell

DEA Number*: [Empty]

DEA State*: Choose a Value

Email Address*: stwari@esasiaconsulting.com

Date of Birth (MMDDYYYY)*: [Empty]

Home Street Address*: [Empty]

Home City*: [Empty]

Home State*: Choose a Value

Home Zip*: [Empty]

Social Security Number*: [Empty]

The following fields are optional; however, if entered accurately will help confirm your identity.

Credit Card Number: [Empty]

Phone: [Empty]

Driver's License State: Choose a Value

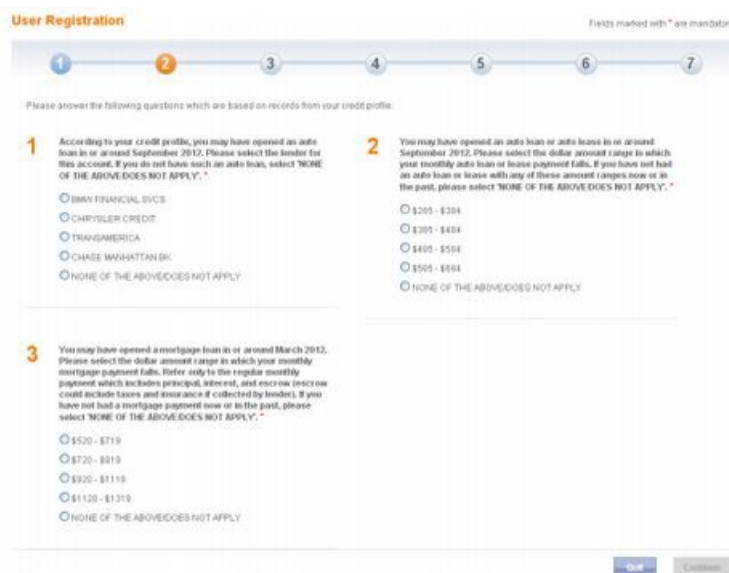

Driver's License Number: [Empty]

Your name is shown above as it appears in the National NPI Registry. If this is incorrect please contact the National Plan & Enumeration System.

Powered by 

If you are using a credit card to assist with confirming your identity, you must use a personal Visa or Mastercard, not a debit card. It is important to enter an address and that matches the billing address and phone number associated with the credit card used.

When entering your DEA #, use all capital letters (for example AA1234567, not aa1234567 or Aa1234567). Enter your primary DEA #, not a special DEA # or special identification # that has been assigned to you in order to prescribe addiction medications. If you enter incorrect demographic information, EPCS Gold displays a message that informs you of an unsuccessful identity-proofing. If you enter demographic information correctly, the IDP process progresses to the next step where you are asked a series of questions pertaining to personal financial information.

User Registration Fields marked with * are mandatory

1 2 3 4 5 6 7

Please answer the following questions which are based on records from your credit profile.

1 According to your credit profile, you may have opened an auto loan in or around September 2012. Please select the lender for this account. If you do not have such an auto loan, select **NONE OF THE ABOVE/DOES NOT APPLY**.

- BMW FINANCIAL SVCS
- CHRYSLER CREDIT
- TRUNGAMERICA
- CHASE MANHATTAN BK
- NONE OF THE ABOVE/DOES NOT APPLY

2 You may have opened an auto loan or auto lease in or around September 2012. Please select the dollar amount range in which your monthly auto loan or lease payment falls. If you have not had an auto loan or lease with any of these amount ranges now or in the past, please select **NONE OF THE ABOVE/DOES NOT APPLY**.

- \$200 - \$304
- \$305 - \$404
- \$405 - \$504
- \$505 - \$604
- NONE OF THE ABOVE/DOES NOT APPLY

3 You may have opened a mortgage loan in or around March 2012. Please select the dollar amount range in which your monthly mortgage payment falls. Refer only to the regular monthly payment which includes principal, interest, and escrow (escrow could include taxes and insurance if collected by lender). If you have not had a mortgage payment now or in the past, please select **NONE OF THE ABOVE/DOES NOT APPLY**.

- \$520 - \$719
- \$720 - \$919
- \$920 - \$1119
- \$1120 - \$1319
- NONE OF THE ABOVE/DOES NOT APPLY

Next Continue

 **Note:** The system does not allow the provider to continue identity-proofing for 24 hours if any of the questions are answered unsuccessfully three times in a row. Once completed, the IDP process progresses automatically to Step 4, confirming that you have verified your identity.

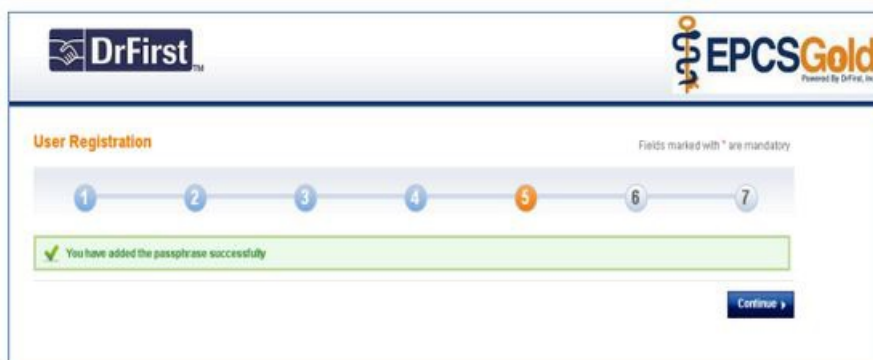

Next, you have to create a passphrase to use to access your account in the future and during the process of sending a scheduled medication within OP. The passphrase needs to be at least 8 characters long and must include at least one capital letter and one number.

OP technical support is not able to reset your passphrase. If you forget your passphrase, only you can reset it. You must therefore create a security question/answer in case you forget your passphrase and need to reset it.

EPCS Gold displays a confirmation message when you successfully create the passphrase.

In Step 6, the IDP process asks you to add your EPCS token(s) to your account. In order to do this, you need the hard token that you received from DrFirst by USPS. To obtain the One-Time-Password/PIN (OTP), push the blue button.

You can also use a soft token to activate your account. To use a soft token, access your App Store, search for the VIP Access

application, and download it to your device. The device must be separate from the device you are using to prescribe controlled substances.

When you set up your soft token, you are asked to enter the following information:

1. A nickname for your token.
2. The serial number from the back of the hard token, which starts with AVT, or the Credential ID from the token downloaded from the App Store, which starts with VSMT. When entering the serial number, make sure to enter the serial number/Credential ID using all capital letters.
3. The OTP PIN from the hard token (security code from the soft token). Note: On the hard token, the PIN changes every 30 seconds, so if it disappears before you have a chance to enter it, simply push the blue button again.

After completing the IDP process, providers have the ability to add multiple tokens to their account. Providers that do not wish to add multiple tokens after completing the IDP process can click Cancel Additional Token. Providers continue to have the ability to manage their tokens within the EPCS Gold Prescriber Dashboard later if needed.

The screenshot shows the 'Register Tokens' page in the EPCS Gold interface. At the top, there are logos for DrFirst and EPCS Gold. Below the logos is a progress bar with seven steps, where step 6 is highlighted in orange. A green message box states 'Successfully activated token with serial no. VSST51437993'. Below this is a table titled 'Registered Tokens' with the following data:

Token Name	Serial No.	Status
18.130.FD.34	VSST51437993	Active

Below the table is an 'Add Token' section with three input fields: 'Token Name *', 'SN or Credential ID *', and 'OTP PIN or Security Code *'. At the bottom of this section are two buttons: 'Save Token Information' and 'Cancel Additional Token'.

Finally, EPCS Gold displays a confirmation message that your token has been added to your account.

The screenshot shows the 'Register Tokens' page in the EPCS Gold interface. At the top, there are logos for DrFirst and EPCS Gold. Below the logos is a progress bar with seven steps, where step 6 is highlighted in orange. A green message box states 'Successfully activated token with serial no. VSMT06213209'. Below this is a table titled 'Registered Tokens' with the following data:

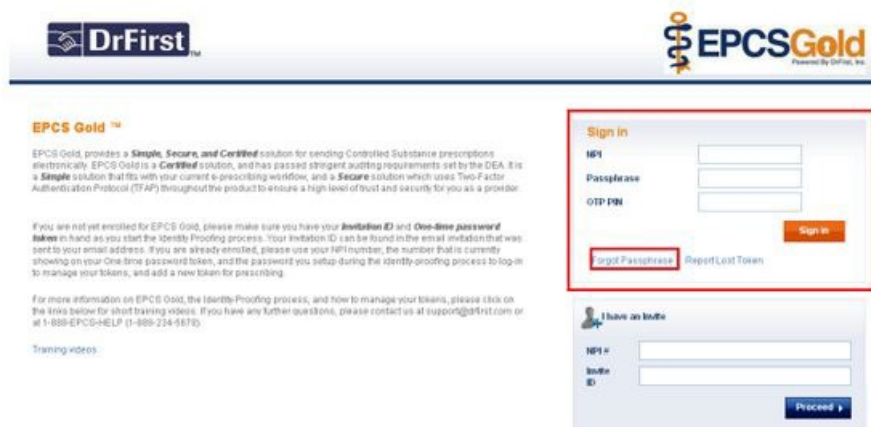

Token Name	Serial No.	Status
phone token	VSMT06213209	Active

At the bottom right of the page is a 'Continue' button.

The seven-step IDP process concludes with Experian, the vendor that DrFirst has selected to provide identity verification, sending a letter by FedEx. This letter includes an IDP confirmation code for the identity-verification session you completed and instructs you to log back in to enter the confirmation code.

To become fully enrolled, you must then log back into the EPCS Gold website and enter the IDP Confirmation Code that is included in the letter. In order to log back in, you need your token to enter the OTP PIN and the passphrase that you created when activating your EPCS token (as described above). You can reset your passphrase if you forget it.

After you've logged on, in the Enter Transaction ID field, enter the IDP Confirmation Code or Transaction ID included in the letter that Experian sent you. After entering the IDP Confirmation Code or Transaction ID, click the Continue.

Note: Providers are only fully enrolled after they have entered the IDP Confirmation Code into the website according to the instructions. Each provider must complete all seven steps of the IDP process. Any provider that does not complete all seven steps must begin the process again by accessing the link to the IDP system that was in the original email that

DrFirst sent. If you have any questions about completing the IDP process, or if you are unsure if Step 7 has been completed, send an email to registerepcs@drfirst.com.

After your provider(s) have completed Step 7 of the IDP process, each provider must be activated for EPCS in the Logical Access Control (LAC) dashboard from within the OP application. The LAC is only available to OP users who have administrative access (such as a user who has the ability to change system preferences under System Administration). There is no need for administrative users to be registered with DrFirst. From the LAC, an administrative user is able to activate and deactivate a provider for EPCS. In order to activate your provider(s), the administrative user must select each provider, select the Active checkbox, then ask the provider to enter his or her own passphrase and PIN from their hard or soft token. The DEA prohibits providers from activating their own EPCS accounts. DrFirst abides by this regulation and requires providers to follow this regulation as well.

Version 14.10

EPCS Identity-Proofing Procedures

The DrFirst Identity-Proofing (IDP) process is managed by [Experian](#) entirely online. The IDP process verifies identities using a combination of personal identity verification (such as confirming name, address, Social Security number, DEA number, date of birth), knowledge-based authentication (interactive questions designed to ensure an individual is who they claim to be), and verification of account information (generally a financial instrument such as a credit card number). The provider must also activate the token they receive and link it to their account.

Once you are contracted for EPCS, DrFirst sends written instructions via email about how to complete the IDP process. The email includes a link to initiate the process with Experian.

 **Note:** The link to initiate the process expires after 30 days.

In addition, a hard token is shipped via USPS Priority Mail to the address on file for your practice. Another token can be provided upon request for an additional cost.

 **Note:** Do not lose your hard token! You need this token to complete the IDP process and to generate a secure passcode each time you write a prescription for a controlled substance.

HARD TOKEN

You can see a size comparison of the Hard Token to a human hand in the image below.

In addition, providers have the option to download a soft token to their smartphone, tablet or desktop. [Click here](#) to learn how to download the VIP Access soft token by Symantec to each device.

Note: The DEA requires that providers use a soft token on a device that is separate from the device they use for ePrescribing.

SOFT TOKEN (*Free iPhone or Android app*)

Note: Please ensure that your provider(s) have a token while setting up their individual EPCS user account. Although the EPCS system allows them to set up their account without their token, the process ultimately fails and they are directed to restart.

As an alternative to a hard or soft token, Imprivata allows you to use biometric, two-factor authentication. To use Imprivata you must:

1. Upgrade to OneSign 5.0.
2. Add Confirm ID 1.0.
3. Have an Imprivata test server.
4. Install ActiveX controls on each workstation.

EPCS Gold communicates directly with the Imprivata agent software installed locally through the web browser by using ActiveX controls. The Imprivata agent on the local computer is configured to then communicate to your site's own Imprivata server.

To begin the IDP process, open the registration invite you received by email and click the **Link** to register. Your browser opens to the registration website. Enter your **NPI** and the **Invite ID** included in the email.

Select the **Checkbox** and click the **I Agree** button to accept the terms of use.

Next, check and acknowledge the prerequisites and click the **Continue** button.

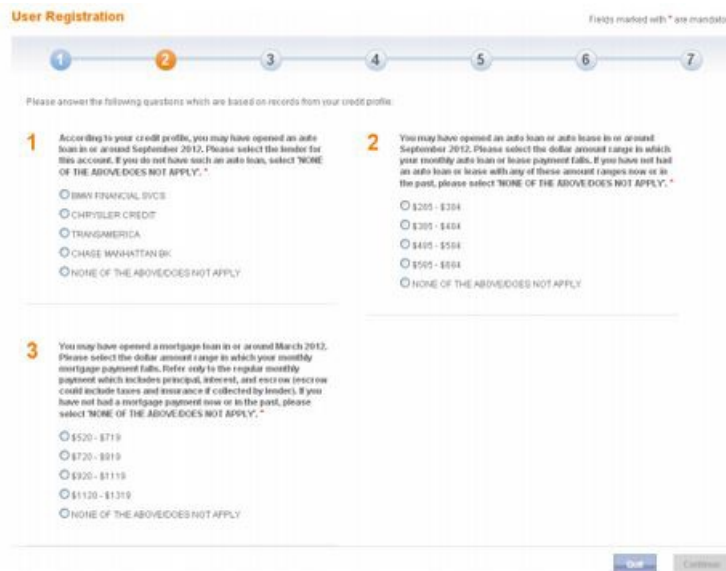

The seven-step IDP process now begins. The first step is User Registration. Enter all required **Personal Information**. Optionally, enter credit-card information to assist with accurately confirming your identity.

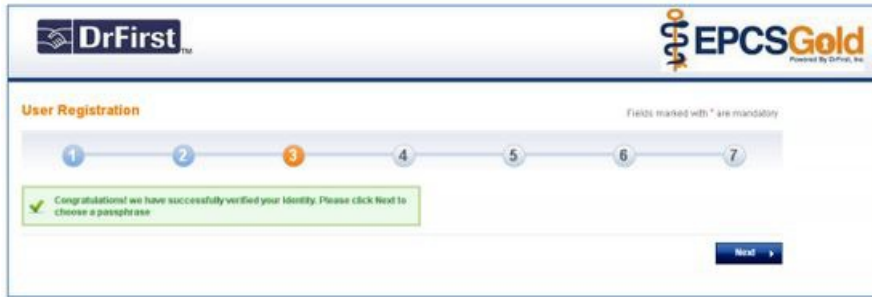

If you are using a credit card to assist with confirming your identity, you must use a personal Visa or Mastercard, not a debit card. It is important to enter an address and that matches the billing address and phone number associated with the credit card used.

When entering your DEA #, please use all capital letters (for example AA1234567, not aa1234567 or Aa1234567). Enter your primary DEA #, not a special DEA # or special identification # that has been assigned to you in order to prescribe addiction medications.

If you enter incorrect demographic information, EPCS Gold presents you with a message that informs you of an unsuccessful identity-proofing. If you enter demographic information correctly, the IDP process progresses to the next step where you are asked a series of questions pertaining to personal financial information.

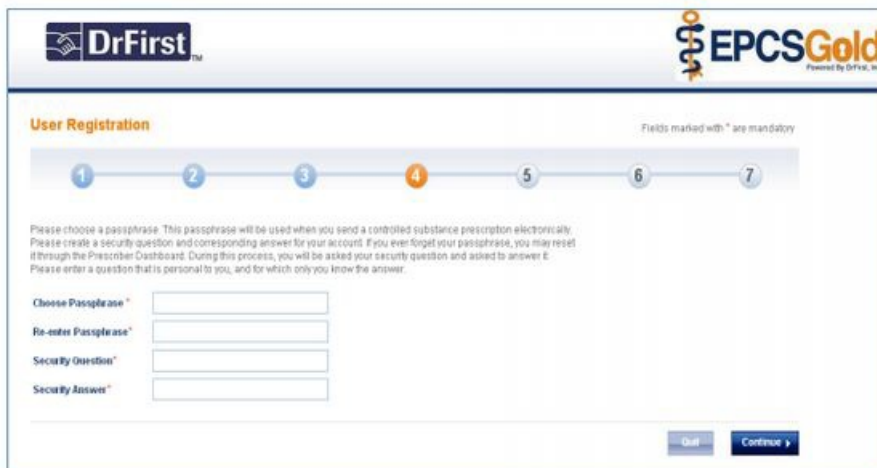

Note: The system does not allow the provider to continue identity-proofing for 24 hours if any of the questions are answered unsuccessfully three times in a row. Once completed, the IDP process progresses automatically to Step 4, confirming that you have verified your identity.

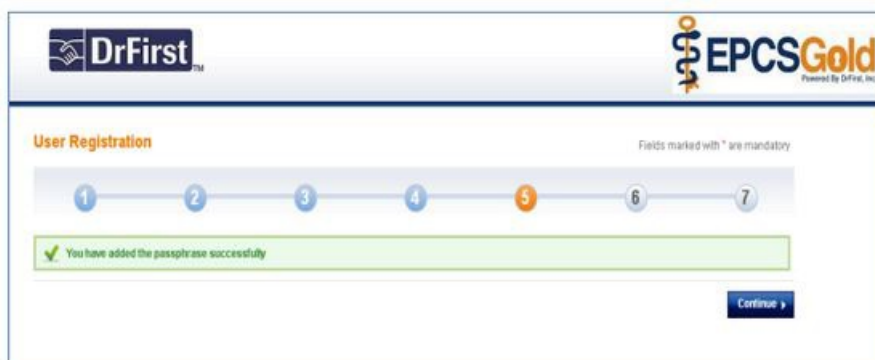

Next, you must create a passphrase that is used to access your account in the future and during the process of sending a scheduled medication within OP. The passphrase needs to be at least 8 characters long and must include at least one capital letter and one number.

OP technical support is not able to reset your passphrase. If you forget your passphrase, only you can reset it. You must therefore create a security question/answer in case you forget your passphrase and need to reset it.

EPCS Gold displays a confirmation message when you successfully create the passphrase.

In Step 6, the IDP process asks you to add your EPCS token(s) to your account. In order to do this, you need the hard token that you received from DrFirst via USPS. To obtain the One-Time-Password/PIN (OTP), push the blue button.

You can also use a soft token to activate your account. To use a soft token, access your App Store, search for the VIP Access

application, and download it to your device. The device must be separate from the device you are using to prescribe controlled substances.

When you set up your soft token, you are asked to enter the following information:

1. A nickname for your token.
2. The serial number from the back of the hard token, which starts with AVT, or the Credential ID from the token downloaded from the App Store, which starts with VSMT. When entering the serial number, make sure to enter the serial number/Credential ID using all capital letters.
3. The OTP PIN from the hard token (security code from the soft token). Note: On the hard token, the PIN changes every 30 seconds, so if it disappears before you have a chance to enter it, simply push the blue button again.

After completing the IDP process, providers have the ability to add multiple tokens to their account. Providers that do not wish to add multiple tokens after completing the IDP process can click Cancel Additional Token. Providers continue to have the ability to manage their tokens within the EPCS Gold Prescriber Dashboard later if needed.

The screenshot shows the 'Register Tokens' page in the EPCS Gold interface. At the top, there are logos for DrFirst and EPCS Gold. Below the logos is a progress bar with seven steps, where step 6 is highlighted in orange. A green banner displays a success message: 'Successfully activated token with serial no. VSST51437993'. Below this is a table titled 'Registered Tokens' with the following data:

Token Name	Serial No.	Status
18.130.FD.34	VSST51437993	Active

Below the table is an 'Add Token' section with three input fields: 'Token Name *', 'SN or Credential ID *', and 'OTP PIN or Security Code *'. Each field has a red asterisk icon. At the bottom of this section are two buttons: 'Save Token Information' and 'Cancel Additional Token'.

Finally, EPCS Gold displays a confirmation message that your token has been added to your account.

This screenshot shows the 'Register Tokens' page after a successful registration. The progress bar now shows step 6 as completed and step 7 as the current step. The success message reads: 'Successfully activated token with serial no. VSMT06213209'. The 'Registered Tokens' table is updated with the following data:

Token Name	Serial No.	Status
phone token	VSMT06213209	Active

At the bottom right of the page, there is a blue 'Continue' button.

The seven-step IDP process concludes with Experian, the vendor that DrFirst has selected to provide identity verification, sending a letter by FedEx. This letter includes an IDP confirmation code for the identity-verification session you completed and instructs you to log back in to enter the confirmation code.

To become fully enrolled, you must then log back into the EPCS Gold website and enter the IDP Confirmation Code that is included in the letter. In order to log back in, you need your token to enter the OTP PIN and the passphrase that you created when activating your EPCS token (as described above). You can reset your passphrase if you forget it.

After you have logged on, in the Enter Transaction ID field, enter the **IDP Confirmation Code** or **Transaction ID** included in the letter that Experian sent you. After entering the IDP Confirmation Code or Transaction ID, click the Continue.

Note: Providers are only fully enrolled after they have entered the IDP Confirmation Code into the website according to the instructions. Each provider must complete all seven steps of the IDP process. Any provider that does not complete all seven steps must begin the process again by accessing the link to the IDP system that was in the original email that

DrFirst sent. If you have any questions about completing the IDP process, or if you are unsure if Step 7 has been completed, please send an email to registerepcs@drfirst.com.

After your provider(s) have completed Step 7 of the IDP process, each provider must be activated for EPCS in the **Logical Access Control (LAC)** dashboard from within the OP application. The LAC is only available to OP users who have administrative access (such as a user who has the ability to change system preferences under System Administration). There is no need for administrative users to be registered with DrFirst. From the LAC, an administrative user is able to activate and deactivate a provider for EPCS. In order to activate your provider(s), the administrative user must select each provider, check 'Active,' then ask the provider to enter his or her own passphrase and PIN from their hard or soft token. The DEA prohibits providers from activating their own EPCS accounts. DrFirst abides by this regulation and requires providers to follow this regulation as well.

[Click here](#) to view a video of the IDP process.
