

### Important Content Update Message

We are currently updating the OP Help Center content for the release of OP 20. OP 20 (official version 20.0.x) is the certified, 2015 Edition, version of the Office Practicum software. This is displayed in your software (**Help tab > About**) and in the Help Center tab labeled Version 20.0. We appreciate your patience as we continue to update all of our content.

## Camera

Last Modified on 12/19/2019 3:43 pm EST

The following Specifications and Recommendations made by Office Practicum are based solely on what has worked for our clients.

We are in no way endorsing the use of one product over another. Please consult with your IT Professional to make sure your devices meet our minimum requirements.

 Windows 10 is supported on OP versions 14.6 and up

## Camera

You should have a small, tethered 480 dpi Internet camera with a TWAIN interface.

There are many camera options available and 'cheap' cameras can last a long time if they are taken care of - prices can range but we recommend spending around \$50.

Dell has cameras available in this price range.

### Note: Webcams will work in OP

If you purchase a webcam that does not come with TWAIN drivers OP does have the ability to enable any Windows certified webcam to work.
