> 🎯 This window map article points out some of the important aspects of the window you're working with in OP but is not intended to be instructional. To learn about topics related to using this window, see the **Related Articles** section at the bottom of this page.

About Patient Encounter: Allergies

> **Path: Clinical, Practice Management, or Billing tab > Patient Chart button > Encounter > New or Open Note button > Allergies**

The Allergies window is used to document medication-related and non-medication-related allergies and vaccine reactions during the patient's visit. It is also used to review the patient's documented allergies/reactions. This section of the Encounter Note is chart-driven, meaning that the information populated here is pulled from and pushed back to the same section in the Patient Chart.

Patient Encounter: Allergies Map

| Number	Section	Description
1	Allergies button	The Allergies button accesses the Allergies window in the patient's Encounter Note.
2	Encounter Function buttons	The Function buttons delete an entire Encounter Note, edit an Encounter Note, or save an Encounter Note.

3	Allergy/Reaction List Function buttons	The Allergy/Reaction functions buttons: • **New**: Opens the **Allergy/Reaction** window to add an allergy/reaction to the Allergy/Reaction List. • **Edit**: Opens the **Allergy/Reaction** window to alter the selected allergy/reaction in the Allergy/Reaction List. • **Delete**: Deletes an allergy/reaction from the Allergy/Reaction list. • **Mark Reviewed**: Marks the Allergy/Reaction list as reviewed. The reviewed indication is time stamped. • **Print**: Prints the patient's Allergy/Reaction List. • **"No Med Allergies"**: Adds an indicator in the Encounter that there are no active allergies/reactions for the patient. • **Refresh**: Allows users to refresh the screen after entering their Emergency Override credentials.
4	Flag as Incomplete checkbox	The **Flag as Incomplete** checkbox marks an Encounter as unfinished.
5	Prioritize buttons	The **Prioritize** buttons move an allergy/reaction up and down in the Allergy/Reaction list.
6	Allergy/Reaction List	The Allergy/Reaction List is a list of all the patient's allergies/reactions (past and present). The list contains the allergy/reaction, notes, status, onset date, resolved indication, and updated date.
7	PMFS History/Meds Reviewed	The **PMFS History/Meds Reviewed** field is populated as allergies/reactions are marked as reviewed. This text box can also be used to enter or review a patient's past or current allergies/reactions. You can also indicate that the patient does not have any allergies/reactions in this field. Current Allergies can also be listed in this field.
