

# Well Visit: Allergies

Last Modified on 11/21/2022 8:37 am EST

Version 20.18

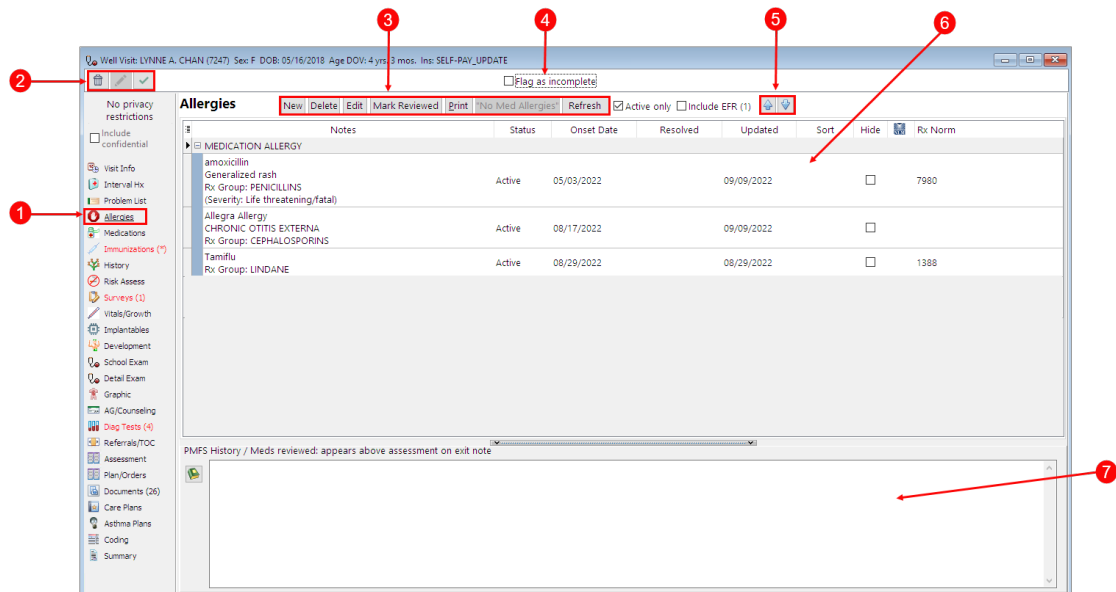

This window map article points out some of the important aspects of the window you're working with in OP but is not intended to be instructional. To learn about topics related to using this window, see the **Related Articles** section at the bottom of this page.

## About Well Visit: Allergies

**Path: Clinical, Practice Management, or Billing tab > Patient Chart button > Well Visits > New or Open Note button > Allergies**

The Allergies window is used to document medication-related and non-medication-related allergies and vaccine reactions during the patient's visit. It is also used to review the patient's documented allergies/reactions. This section of the Well Visit Note is chart-driven, meaning that the information populated here is pulled from and pushed back to the same section in the Patient Chart.

## Well Visit: Allergies Map

Number	Section	Description
1	Allergies button	The Allergies button accesses the Allergies window in the patient's Well Visit Note.
2	Well Visit Function buttons	The function buttons delete an entire Well Visit Note, edit a Well Visit Note, or save a Well Visit Note.

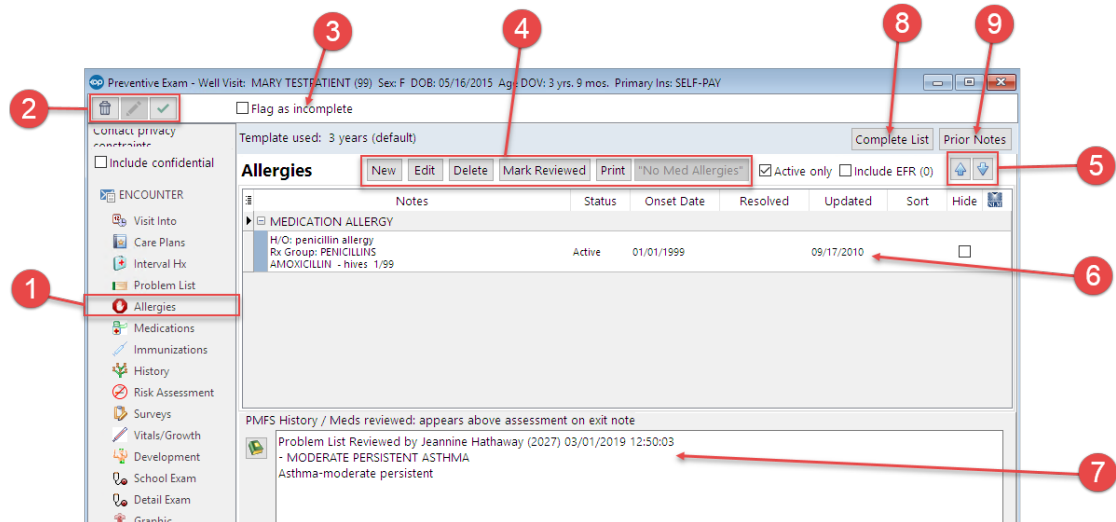

3	Allergy/Reaction List Function buttons	<p>The Allergy/Reaction functions buttons:</p> <ul style="list-style-type: none"> <li>• <b>Print:</b> Prints the patient's Allergy/Reaction List.</li> <li>• <b>Add:</b> Opens the <b>Allergy/Reaction</b> window to add an allergy/reaction to the Allergy/Reaction List.</li> <li>• <b>Edit:</b> Opens the <b>Allergy/Reaction</b> window to alter the selected allergy/reaction in the Allergy/Reaction List.</li> <li>• <b>Delete:</b> Deletes an allergy/reaction from the Allergy/Reaction list.</li> <li>• <b>Mark Reviewed:</b> Marks the Allergy/Reaction list as reviewed. The reviewed indication is time stamped.</li> <li>• <b>"No Med Allergies":</b> Adds an indicator in the Well Visit Note that there are no active allergies/reactions for the patient.</li> <li>• <b>Refresh:</b> Allows users to refresh the screen after entering their Emergency Override credentials.</li> </ul>
4	Flag as Incomplete checkbox	The <b>Flag as Incomplete</b> checkbox marks the Well Visit Note as unfinished.
5	Prioritize button	The <b>Prioritize</b> buttons move an allergy/reaction up and down in the Allergy/Reaction list.
6	Allergy/Reaction List	The Allergy/Reaction List is a list of all the patient's allergies/reactions (past and present). The list contains the allergy/reaction, notes, status, onset date, resolved indication, and updated date.
7	PMFS History/Meds Reviewed	The <b>PMFS History/Meds Reviewed</b> field is populated as allergies/reactions are marked as reviewed. This text box can also be used to enter or review a patient's past or current allergies/reactions. You can also indicate that the patient does not have any allergies/reactions in this field. Current Allergies can also be listed in this field.

Current Allergies can also be listed in this field.

8	Complete List button	The <b>Complete List</b> button lists the templates that are created, edited, and reviewed in the <b>Well Visit Template Editor</b> . Templates are pre-written scenarios you can use in a Well Visit to document common pediatric diagnoses. Templates include detailed descriptions of the usual pertinent positive and negative findings of a wide variety of illnesses, with a standard assessment, plan, and ICD-10 coding. Included with your installation of Office Practicum are Pediatric specific templates.
9	Prior Notes button	The <b>Prior Notes</b> button opens a list of the patient's prior Visit Notes.
