

# Well Visit: Medications

Last Modified on 09/22/2021 9:12 am EDT

Version 20.13

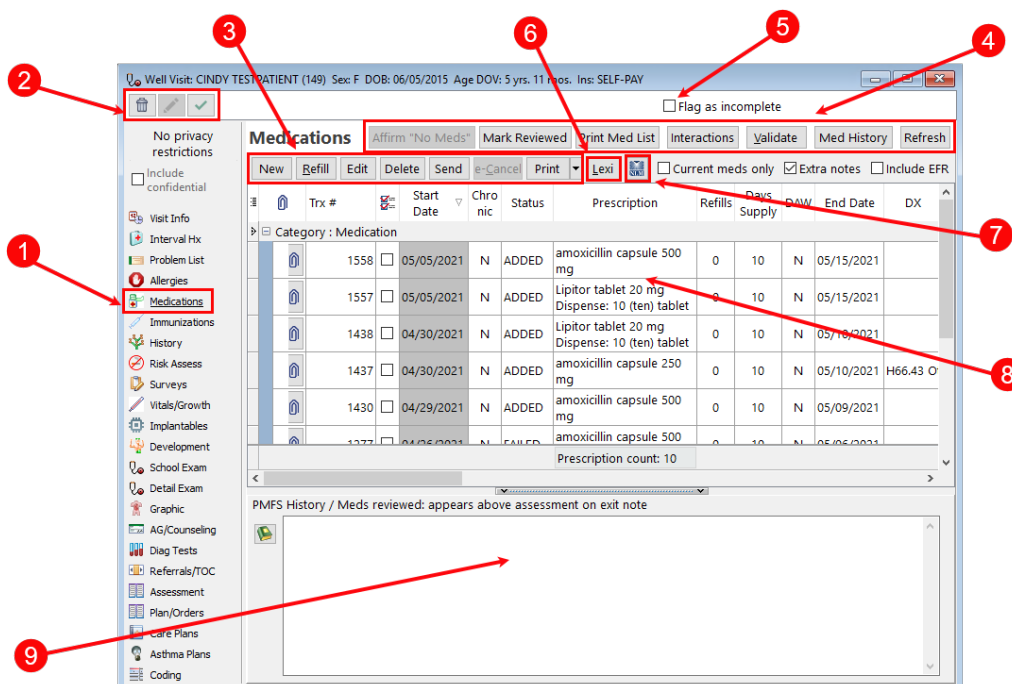

This window map article points out some of the important aspects of the window you're working with in OP but is not intended to be instructional. To learn about topics related to using this window, see the **Related Articles** section at the bottom of this page.

## About Well Visit: Medications

**Path: Clinical, Practice Management, or Billing tab > Patient Chart button > Well Visits > New or Open Note button > Medications**

The Medication window lists all of the patient's current, ongoing, and past prescriptions. Here, new prescriptions can be created and existing prescriptions can be edited, managed, refilled, and transmitted electronically to pharmacies, all while in a Well Visit Note. This section of the Well Visit Note is chart-driven, meaning that the information populated here is pulled from and pushed back to the same section in the Patient Chart.

## Well Visit: Medications Map

Number	Section	Description
1	Medications button	The Medications section of the Well Visit displays the same Medication information that is found in the patient's chart.
2	Well Visit Function buttons	The Well Visit function buttons delete an entire Well Visit Note, edit a Well Visit Note, or save a Well Visit Note. <ul style="list-style-type: none"> <li><b>New:</b> Opens the prescription writer to create and add a new prescription to the Medication List</li> </ul>

3	Function buttons	<ul style="list-style-type: none"> <li>• <b>Refill:</b> Allows you to refill the selected medication</li> <li>• <b>Edit:</b> Views and edits a selected medication</li> <li>• <b>Delete:</b> Deletes a prescription from the Medication List. <b>This is not used to discontinue medications.</b></li> <li>• <b>Send:</b> Transmits the selected prescription to the pharmacy</li> <li>• <b>e-Cancel:</b> Cancels an electronic prescription. When selected, a cancel message is sent to the pharmacy. The e-Cancel button is only visible if the prescriber has the cancel permission.</li> <li>• <b>Print:</b> Prints the selected prescription</li> </ul>
4	Action buttons	<ul style="list-style-type: none"> <li>• <b>Affirm No Meds:</b> Displays an indicator that there are no active medications for the patient</li> <li>• <b>Mark Reviewed:</b> Logs an entry that the Medication List was reviewed</li> <li>• <b>Print Med List:</b> Prints the patient's Medication List</li> <li>• <b>Interactions:</b> Calculates the med/med, med/allergy, and med/disease interactions for all medications or current medications. Warning levels depend upon system preference.</li> <li>• <b>Validate:</b> Checks pharmacy benefits. These are displayed in the <b>Pharmacy Benefits</b> tab of the patient's Insurance record (Patient Chart).</li> <li>• <b>Med History:</b> Imports medication history from public sources</li> </ul>
5	Flag as Incomplete checkbox	The <b>Flag as Incomplete</b> checkbox marks the Well Visit as unfinished. The Visit date field indicates the date that the patient visit occurred.
6	Lexi button	The <b>Lexi</b> button accesses Lexicomp Online, a medical library consisting of a collection of clinical databases and decision support tools.
7	NLM button	The <b>NLM</b> button accesses the National Library of Medicine library of online educational material for a selected medication.
8	Medication list	The Medication list is a list of all the patient's medications (past and present). The list indicates the medication, start date, chronic indication, status, refills, days supply, end date, diagnosis, provider, purpose, pharmacist note, etc. Clicking the <b>Paperclip</b> button adds the selected medication to the PMFS History text box.
9	PMFS History/Meds Reviewed	The PMFS History/Meds Reviewed field is a text box where you can enter or review a patient's past or current medications. You can also indicate that the patient does not take any medications in this field. Current medications can also be listed in this field.

## About Well Visit: Medications

**Path: Clinical, Practice Management, or Billing tab > Patient Chart button > Well Visits > New or Open Note button > Medications**

The Well Visit window charts a patient well-visit exam. The Well Visit window helps to code and complete a preventive encounter visit. The Well Visit note encompasses both narrative and comprehensive formats. It also allows you to customize the layout of the note. The note is added to the patient chart.

The Medications window displays and documents patient medications.

## Well Visit: Medications Map
