

# Well Visit: Risk Assessment

Last Modified on 09/22/2021 11:33 am EDT

Version 20.10

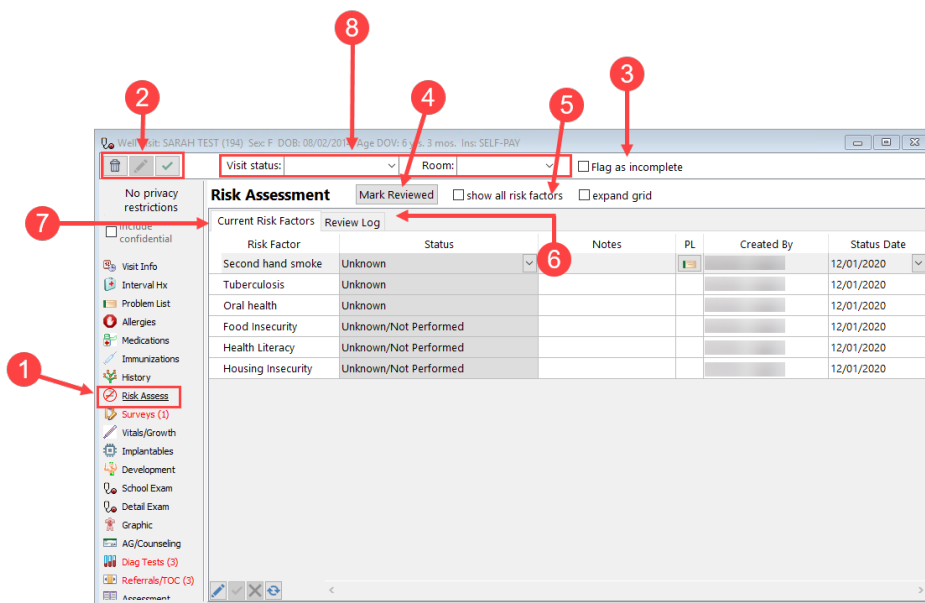

This window map article points out some of the important aspects of the window you're working with in OP but is not intended to be instructional. To learn about topics related to using this window, see the **Related Articles** section at the bottom of this page.

## About Well Visit: Risk Assessment

**Path: Clinical, Practice Management, or Billing tab > Patient Chart button > Well Visits > New or Open Note button > Risk Assess**

Within the Risk Assessment List, you can choose common risk factors and use them in the care plans for your patients. This helps with using OP for Meaningful Use as well as with OP Care Plans. This section of the Well Visit Note is chart-driven, meaning that the information populated here is pulled from and pushed back to the same section in the Patient Chart.

## Well Visit: Risk Assessment Map

Number	Section	Description
1	Risk Assess button	The Risk Assess button accesses the Risk Assessment window in the patient's Well Visit Note.

		The Show All Risk Factors checkbox displays a complete list of Risk Factors in OP. At

5	Show all risk factors checkbox	times you may wish to update a Risk Factor that is not currently displaying for a child due to their current age (i.e. Smoking Status prior to the age of 13).
6	Review Log tab	The Review Log tab displays entries with the name and the date and time that the Mark Reviewed button was selected.
7	Current Risk Factors tab	The Current Risk Factors tab displays risk factors based on the child's age.
8	Visit Status and Room drop-downs	The Visit Status and Room drop-downs allow the user to select the appropriate status and location of the patient. These selections update the Tracking and Calendar Schedule views.

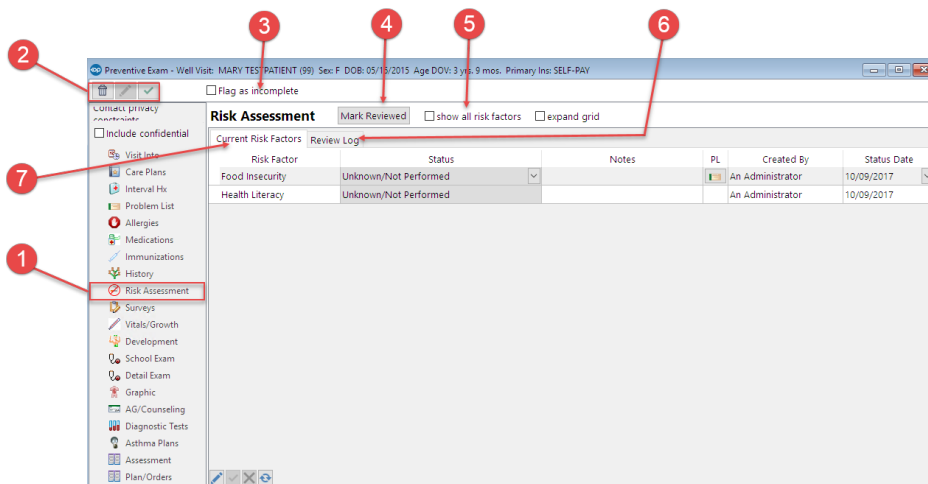

Version 20.8

## About Well Visit: Risk Assessment

**Path: Clinical, Practice Management, or Billing tab > Patient Chart button > Well Visits > New or Open Note button > Risk Assessment**

The Well Visit window charts a patient well-visit exam. The Well Visit window helps to code and complete a preventive encounter visit. The Well Visit note encompasses both narrative and comprehensive formats. It also allows you to customize the layout of the note. The note is added to the patient chart.

The Risk Assessment window displays the risk assessment list. Using the Risk Assessment list, you can choose the current risk factors and use them in the care plans for your patients. This helps with using OP for Meaningful Use as well as with OP Care Plans.

## Well Visit: Risk Assessment Map
