## OP Diagnostic Tests Import Utility 14.1.11

Previous **Next**

**Release Date:** 21-Nov-2014

### General Release Notes Information

These release notes describe the new functionality, improved functionality, and resolved issues included with OP Diagnostic Tests Import Utility Version 14.1.11.

### New Features

#### *Non Module-specific New Features*

There are no new features in this release that impact the overall application.

#### *Module-specific New Features*

There are no new features in this release that impact a specific module.

### Improved Functionality

#### *Non Module-specific Improved Functionality*

There is no improved functionality in this release that impacts the overall application.

#### *Module-specific Improved Functionality*

There is no improved functionality in this release that impacts a specific module.

### Resolved Issues

## Non Module-specific Resolved Issues

### Imported Lab Reports

<b>Issue:</b>	When the DTI received data from the labs, if that data contained a patient name with an apostrophe in it (for example, O'Hara), the DTI would crash.
<b>Resolution:</b>	Updated the software so that, when the DTI receives lab data that contains a patient name with an apostrophe in it, the DTI successfully opens without crashing.

## Module-specific Resolved Issues

### Diagnostic Test Results Tab

<b>Issue:</b>	In the Status field of the Diagnostic Test Results tab, DTI occasionally displayed Legacy even when none of the patient-demographic related fields (for example, Req Date, Pat ID, Patient Name, Test Name) contained information.
<b>Resolution:</b>	Updated the software so that the Status field accurately reflects the status of diagnostic tests listed in the Diagnostic Test Results tab.

### OP Patient Chart / Diagnostic tests

<b>Issue:</b>	When the DTI exported data to OP, occasionally the data would become corrupted and nothing would display in the Notes and Comments field and the Observations field in the Result Details window (Patient Chart / Diagnostic Tests) and the Report itself.
<b>Resolution:</b>	Updated the software so that the DTI correctly exports data and all data correctly displays in OP.

## Known Issues

There are no known issues in this release.
