Dragon Dictation Compatibility

Last Modified on 04/14/2023 1:18 pm EDT

Using Dragon Speech Recognition Software

Dragon Medical has been tested by OP clients and is compatible in most situations with OP. Dragon is a speech-recognition software that allows users to voice their commands to the computer, which will then type it out within OP.

> 📌 **Note**: Dragon is a third-party tool. Any installation, configuration, and support of the product will need to be completed by the IT representative of the practice.
