

Important Content Update Message

We are currently updating the OP Help Center content for the release of OP 20. OP 20 (official version 20.0.x) is the certified, 2015 Edition, version of the Office Practicum software. This is displayed in your software (**Help tab > About**) and in the Help Center tab labeled Version 20.0. We appreciate your patience as we continue to update all of our content.

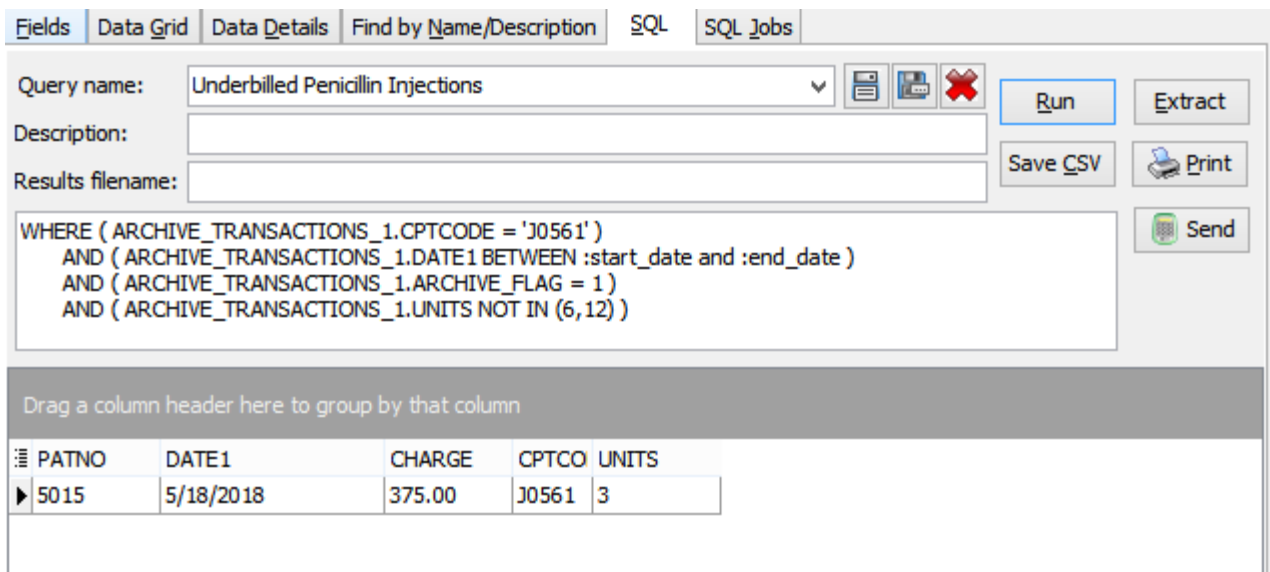

SQL: Underbilled Penicillin Injections

Last Modified on 12/03/2019 10:43 am EST

About

This report shows patients who were billed J0561 (long acting injectable penicillin) with something other than 6 or 12 units between two dates that you specify.

A sample image of this SQL report run in the Database Viewer is shown below:

The screenshot shows a Database Viewer interface with the following elements:

- Navigation tabs: Fields, Data Grid, Data Details, Find by Name/Description, SQL, SQL Jobs.
- Query name: Underbilled Penicillin Injections
- Description: (empty)
- Results filename: (empty)
- SQL Query:

```
WHERE ( ARCHIVE_TRANSACTIONS_1.CPTCODE = 'J0561' )
      AND ( ARCHIVE_TRANSACTIONS_1.DATE1 BETWEEN :start_date and :end_date )
      AND ( ARCHIVE_TRANSACTIONS_1.ARCHIVE_FLAG = 1 )
      AND ( ARCHIVE_TRANSACTIONS_1.UNITS NOT IN (6,12) )
```
- Buttons: Run, Extract, Save CSV, Print, Send.
- Table header: Drag a column header here to group by that column
- Table columns: PATNO, DATE1, CHARGE, CPTCO, UNITS
- Table data:

PATNO	DATE1	CHARGE	CPTCO	UNITS
5015	5/18/2018	375.00	J0561	3

Caveats

- You must be using OP's billing module, and the charge must have gone through the daysheet process.
- Benzathine penicillin is usually given in 600,000U or 1,200,000U doses. The definition of J0561 is "per 100,000U." This means you should be billing J0561 in 6 or 12 units. That said, there may be medical reasons why your providers might use a different dose.
