

# **Synagis Indicator Reports**

Last Modified on 03/12/2021 4:05 pm EST

Version 14.19

#### Overview

If the practice administers Synagis injections, it may be necessary to produce a report of patients for follow-up that have the indicator set. Below are listed several reports that are available. Your practice workflow determines the report that will be used.

#### Vaccine Status Recall

This report will produce a list of patients due for a Synagis injection by a selected recall date. Any patient over two-years-old will no longer appear on the report even if the indicator is still set.

- 1. Navigate to the Demographic Analysis/Recall report: Practice Management tab > Demographic Analysis/Recall.
- 2. Create the Patient Demographics list.
- 3. Click the Vaccine Status Recall tab.
- 4. Select the Behind or Due radio button.
- 5. Click the Vaccine group drop-down and select Synagis.
- 6. Click the Recall date dropdown and select a date from the calendar.
- 7. Click Search.

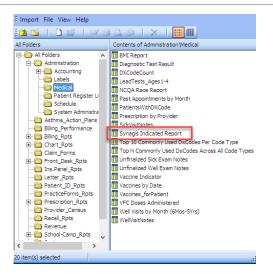

#### **Synagis Indicated Report**

This report will produce a list of all patients that have the Synagis indicator selected in their Immunization record. The report can be used to view patients due for a Synagis injection and also display patients where the indicator should be removed. You must have the proper user permission to access OP Reports to run this report.

- 1. Navigate to OP Reports: **Tools tab > OP Reports**.
- 2. Login to OP Reports using your OP login.
- 3. Click the Administration folder in the All Folders pane.
- 4. Click the Medical folder and double click to run the Synagis Indicated Report.
- 5. (If necessary) Click the Additional folder if Synagis indicated Report is not listed in the Medical folder.

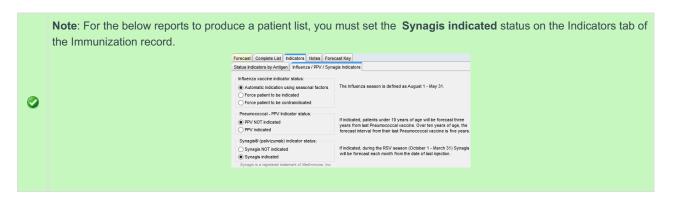

Version 14.10

### Overview

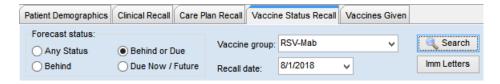

If the practice administers Synagis injections, it may be necessary to produce a report of patients for follow up that have the indicator set. Below are listed several reports that are available. Your practice workflow determines the report that will be used.

#### Vaccine Status Recall

This report will produce a list of patients due for a Synagis injection by a selected recall date. Any patient over two-years old will no longer appear on the report even if the indicator is still set.

- 1. Click the Reports button in the main menu and selectDemographic Analysis/Recall.
- 2. Create the Patient Demographics list. Clickhere for detail information on how to create a patient list.
