What diagnosis codes are included in the 'patient recent' search?

Last Modified on 02/06/2020 3:50 pm EST

While searching for a diagnosis code, you have the option of searching by 'Patient recent'. This option will display diagnosis codes that have been saved in an encounter or well visit note or are listed in an active problem in the patient's problem list.

Note: For problems in the problem list to be displayed in the patient recent search, a diagnosis code must be entered for the problem.
