

SQL: Total Number of Sick (New and Est) by Location and Provider

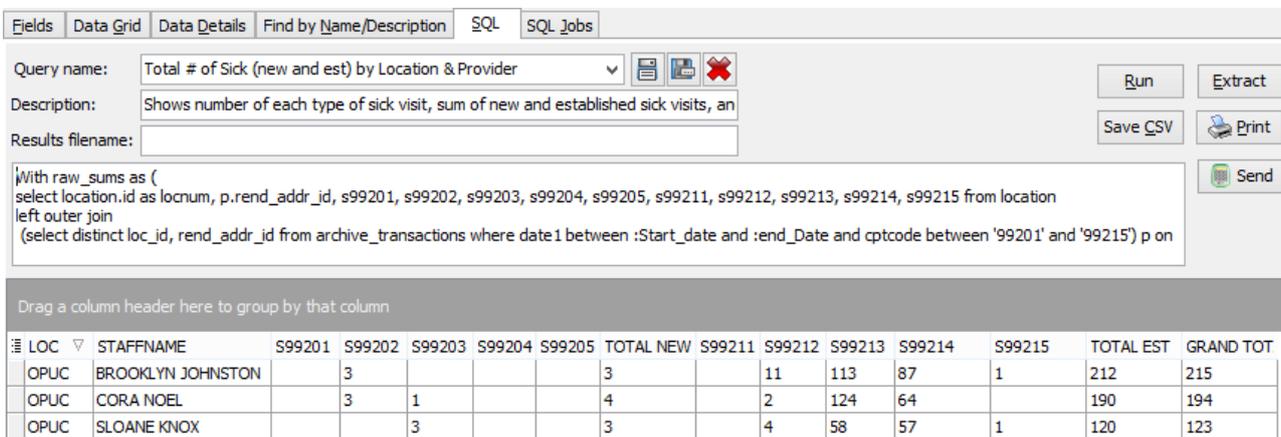

Last Modified on 01/06/2022 10:57 am EST

i There are **two versions** of this SQL: Firebird and MySQL. The **MySQL version** only applies to clients who are **BETA testing MySQL**. All other Practices should continue to use the Firebird version of this code. Click to expand and copy the code you need. If you are unsure which code to use, please check with your Practice Administrator.

About

Shows the number of each type of sick visit, the sum of new and established sick visits, and grand total of sick visits for a period you specify, grouped by location and rendering provider.

A sample image of this SQL report run in the Database Viewer is shown below:

The screenshot shows a Database Viewer interface with the following elements:

- Query name:** Total # of Sick (new and est) by Location & Provider
- Description:** Shows number of each type of sick visit, sum of new and established sick visits, an
- Results filename:** (empty)
- SQL Code:**

```
With raw_sums as (
select location.id as locnum, p.rend_addr_id, s99201, s99202, s99203, s99204, s99205, s99211, s99212, s99213, s99214, s99215 from location
left outer join
(select distinct loc_id, rend_addr_id from archive_transactions where date1 between :Start_date and :end_Date and cptcode between '99201' and '99215') p on
```
- Table Headers:** LOC, STAFFNAME, S99201, S99202, S99203, S99204, S99205, TOTAL NEW, S99211, S99212, S99213, S99214, S99215, TOTAL EST, GRAND TOT
- Table Data:**

LOC	STAFFNAME	S99201	S99202	S99203	S99204	S99205	TOTAL NEW	S99211	S99212	S99213	S99214	S99215	TOTAL EST	GRAND TOT
OPUC	BROOKLYN JOHNSTON		3				3		11	113	87	1	212	215
OPUC	CORA NOEL		3	1			4		2	124	64		190	194
OPUC	SLOANE KNOX			3			3		4	58	57	1	120	123

Caveats

Takes a while to run. Do not run for periods exceeding a year at a time.

SQL Code: Firebird
