

# SQL: Referral Review

Last Modified on 01/06/2022 10:42 am EST

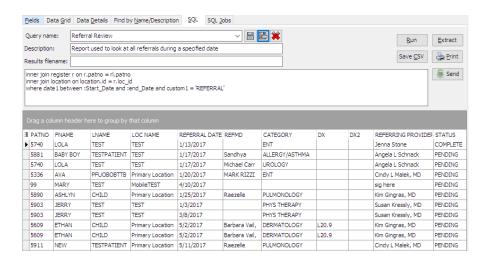

There are two versions of this SQL: Firebird and MySQL. The MySQL version only applies to clients who are BETA testing MySQL. All other Practices should continue to use the Firebird version of this code. Click to expand and copy the code you need. If you are unsure which code to use, please check with your Practice Administrator.

### **About**

This report shows the following information:

- · Patient chart number
- First name
- Last name
- Location
- · Referral date
- Provider to whom patient was referred
- Referral category/type
- Dx code(s)
- · Referring provider
- · Status of referral

A sample image of this SQL report run in the Database Viewer is shown below:

#### Caveats

None.

## SQL Code: Firebird

To highlight and copy the code below to your clipboard, simply click the **Copy** button.

select patno, fname, loc\_name, date1 as referral\_date, refmd, refmdspecialty as category, dx, dx2, p\_md as referring\_provider, status

from referalletter rl

inner join register r on r.patno = rl.patno

inner join location on location.id = r.loc\_id

where date1 between :Start\_Date and :end\_Date and custom1 = 'REFERRAL'

## SQL Code: MySQL

To highlight and copy the code below to your clipboard, simply click the **Copy** button.

select rl.patno, fname, lname, loc\_name, date1 as referral\_date, refmd, refmdspecialty as category, dx, dx2, p\_md as ref erring provider, status

from referalletter rl

inner join register r on r.patno = rl.patno

inner join location on location.id =  $r.loc_id$ 

where date1 between :start\_date and :end\_date and custom1 = 'REFERRAL'
