

### Important Content Update Message

We are currently updating the OP Help Center content for the release of OP 20. OP 20 (official version 20.0.x) is the certified, 2015 Edition, version of the Office Practicum software. This is displayed in your software (**Help tab > About**) and in the Help Center tab labeled Version 20.0. We appreciate your patience as we continue to update all of our content.

# Visit Note Badges

Last Modified on 02/14/2020 2:43 pm EST

Version 20.0

## Overview

Badges in Encounter and Well Visit Notes are calculated in the same way that they are calculated in the **Patient Chart**. For this reason, they are not displayed in both places. Once a visit note is opened (either Encounter or Well Visit) the badges will display in the note window. In general, badges update every two minutes. If an updated badge count is needed before the automatic refresh occurs, the user can right-click in the Navigation Panel and click **Refresh Badges**.

The following items inside the Visit Note behave identically as in the Patient Chart:

- Vital Signs
- Immunizations
- Diagnostic Tests
- Referrals
- Surveys

For more information on the count logic for visit note badges, click [here](#) to view the Patient Chart Badge documentation.
