

We are currently updating the OP Help Center content for the release of OP 14.19 or OP 19. OP 19 is a member of the certified OP 14 family of products (official version is 14.19.1), which you may see in your software (such as in Help > About) and in the Help Center tabs labeled 14.19. You may also notice that the version number in content and videos may not match the version of your software, and some procedural content may not match the workflow in your software. We appreciate your patience and understanding as we make these enhancements.

# Objective 1: Protect Patient Health Information

Last Modified on 09/26/2019 8:16 am EDT

At time of attestation you will need a screenshot of the QIC and a download of the SQL to a CSV file. All information should be saved to your "Book of Evidence". This can be an electronic folder of all documentation for the reporting period.

## Objective 1: Protect Patient Health Information

Objective 1 requires a practice to attest they have conducted a security risk assessment, there is no threshold to meet with this objective.

- Attestation Requirements:
  - Conducted or reviewed a security risk analysis yearly. A security risk analysis must be conducted within the calendar year of the EHR reporting period
  - Implemented security updates as necessary.
  - Corrected identified security deficiencies as part of the provider's risk management process.
- Resources:
  - [Security risk analysis requirements and parameters](#)
  - [Guidance in accordance with HIPAA Security Rule](#)
  - [Free Security Risk Assessment \(SRA\) Tool for EPs](#)
