

Specifying a Generic Medication

Last Modified on 11/28/2023 1:54 pm EST

Version 21.3

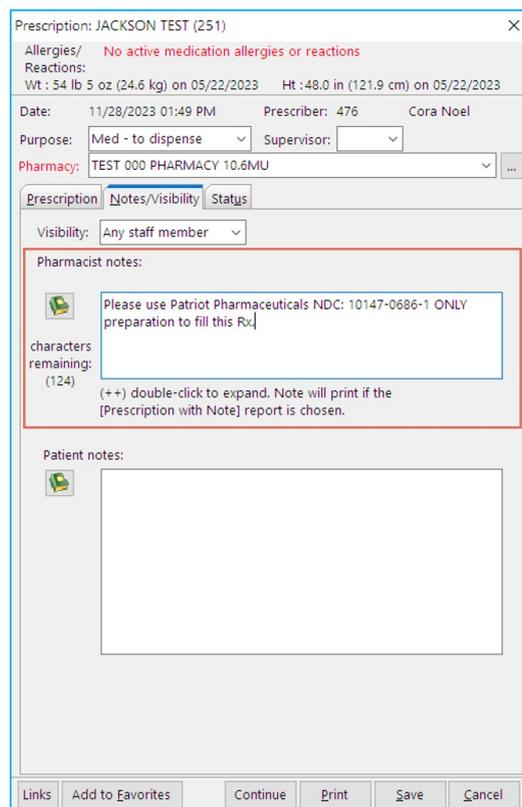

Overview

Currently, if there are multiple manufacturers for the same generic medication, OP only displays one in the Master List. Generally, this is preferred because the user doesn't really want to pick from a potentially long list of generics for most drugs like antibiotics or steroid creams because they all really work the same. However, this is a problem for some important ADD medications because not all of the generics are **bio-equivalent**. For example, the generic for Concerta has different vehicles for how the med is made available in the body, and they don't all have the same efficacy/duration of action.

Prescribers want to specify a particular NDC and manufacturer to make sure the correct medication they want gets dispensed, but they cannot see all of them in the Master List to get to the one they prefer.

Workaround

Pick the only generic available on the Master List, but write a pharmacy note:

The screenshot shows a software window titled "Prescription: JACKSON TEST (251)". It contains several fields: "Allergies/ Reactions:" with the text "No active medication allergies or reactions"; "Wt : 54 lb 5 oz (24.6 kg) on 05/22/2023" and "Ht : 48.0 in (121.9 cm) on 05/22/2023"; "Date: 11/28/2023 01:49 PM", "Prescriber: 476", and "Cora Noel"; "Purpose: Med - to dispense" and "Supervisor:"; and "Pharmacy: TEST 000 PHARMACY 10.6MU". Below these are tabs for "Prescription", "Notes/Visibility", and "Status". Under "Notes/Visibility", there is a "Visibility:" dropdown set to "Any staff member". The "Pharmacist notes:" section is highlighted with a red box and contains a text area with the note: "Please use Patriot Pharmaceuticals NDC: 10147-0686-1 ONLY preparation to fill this Rx." Below the text area is a "characters remaining: (124)" indicator and a note: "(+) double-click to expand. Note will print if the [Prescription with Note] report is chosen." The "Patient notes:" section is empty. At the bottom are buttons for "Links", "Add to Favorites", "Continue", "Print", "Save", and "Cancel".

Version 21.2

Overview

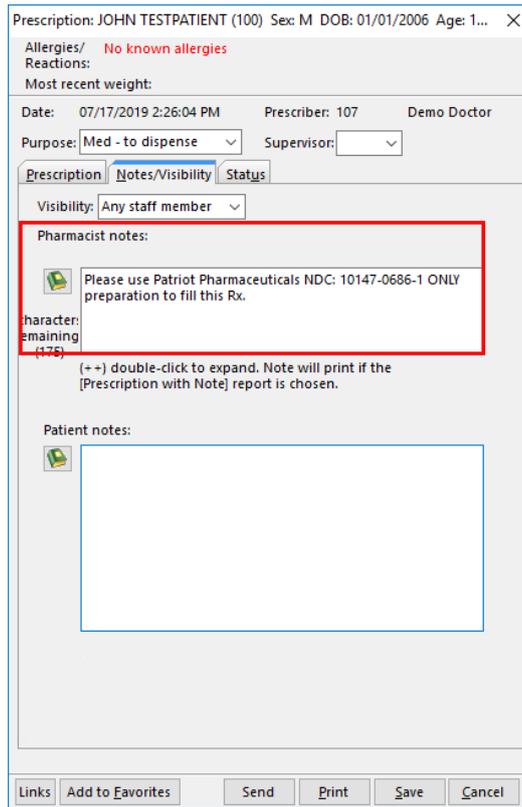

Currently, if there are multiple manufacturers for the same generic medication, OP only displays one in the Master List. Generally, this is preferred because the user doesn't really want to pick from a potentially long list of generics for most drugs like

antibiotics or steroid creams because they all really work the same. However, this is a problem for some important ADD medications because not all of the generics are [bio-equivalent](#). For example, the generic for Concerta has different vehicles for how the med is made available in the body, and they don't all have the same efficacy/duration of action.

Prescribers want to specify a particular NDC and manufacturer to make sure the correct medication they want gets dispensed, but they cannot see all of them in the Master List to get to the one they prefer.

Workaround

Pick the only generic available on the Master List, but write a pharmacy note:

Prescription: JOHN TESTPATIENT (100) Sex: M DOB: 01/01/2006 Age: 1... X

Allergies/ Reactions: **No known allergies**

Most recent weight:

Date: 07/17/2019 2:26:04 PM Prescriber: 107 Demo Doctor

Purpose: Med - to dispense Supervisor: [v]

Prescription | **Notes/Visibility** | Status

Visibility: Any staff member [v]

Pharmacist notes:

 Please use Patriot Pharmaceuticals NDC: 10147-0686-1 ONLY preparation to fill this Rx.

Character: remaining (175)

(+ +) double-click to expand. Note will print if the [Prescription with Note] report is chosen.
