

Important Content Update Message

We are currently updating the OP Help Center content for the release of OP 20. OP 20 (official version 20.0.x) is the certified, 2015 Edition, version of the Office Practicum software. This is displayed in your software (**Help tab > About**) and in the Help Center tab labeled Version 20.0. We appreciate your patience as we continue to update all of our content.

Why am I getting an error for improper vaccine administration route when administering a vaccine?

Last Modified on 02/10/2020 2:38 pm EST

With the new certification standards, users must be prevented from documenting an improper administration route. One of the common vaccines this may be occurring is with Rotavirus. Below is an image of the error message you will receive when an administration route is incorrect.

Enter Vaccine Administration Information

Warnings/Adverse Reactions: No active medication allergies or reactions; No documented food/non-medication allergies

Date/time vaccinated: 7/29/2019 09:43 AM [Vaccination date is passed to superbill]

Vaccine: RotaVirus 1857
Manufacturer: MSD Inventory Status: 21 used 25 total
Expiration date: 9/19/2020
Lot number: R035673

Error
Body: Improper vaccine administration route.
Route:

To correct the error follow the steps below.

1. Navigate to **Practice Management tab > More (Reference Data group) > Vaccine Products**
2. Click the **Vaccine** to be edited.
3. Click the **ellipsis** button.
4. Select the correct Route from the **Route of administration** drop-down menu.

Note: For Rotavirus the route of administration should be PO.

5. Click the **Save** button.

6. For complete information on Vaccine Products, click [here](#).
