MU SQL Objective 2: E-Prescribing With Formulary Query

Last Modified on 04/08/2024 12:51 pm EDT

SQL for Objective 2: E-Prescribing with Formulary Query

You will be prompted to enter the reporting period start and end date and the provider's OP ID number.

Report Usage Ideas

For more information about how this report is constructed, see Objective 2: Electronic Prescribing.

Code

To highlight and copy the code below to your clipboard, simply click the **Copy** button.

Copy

```
select case when purpose = 'Med - to dispense' and RX_prescrib_id <>'' and medications.checked_formulary = 1 then
 'pass' else 'fail' end as metric,
medications.patno, date1, prescrib, purpose, dea_schedule, drug_availability, checked_formulary, rx_prescrib_id
from medications where date1 between :start_date and :end_date and p_addr_id =:provider and purpose in ('Med - to
dispense','Med - unformatted') and medications.drug_availability <> 'OTC'
```
