e-Prescribing Center Badges

Last Modified on 09/24/2019 8:02 am EDT

Once **e-Prescribe** or **Refill Reqs** is clicked in the Main Navigation Panel, users are taken to the ePrescribing Center. This is where all patient prescriptions are displayed. The window will either open on Created, Not Printed/Sent or Refill Requests depending on which Main Navigation Panel item is clicked.

All of the tabs in the ePrescribing Center reflect the default 7 day period as displayed in the Written date fields. Counts will reflect that time span as well as the Prescriber, which defaults to the logged-in prescriber. The only counts that will be red are for prescriptions that Failed, or are in the Created, Not Printed/Sent for more than 30 minutes.

Where possible, the counts are filtered to the prescriber (Created, Not Printed/Sent, Sent, Delivered, Failed, EPCS Pending). Where not possible (Need Co-signature, Refill/Change Requests, Refills Denies, ePA), the counts and details reflect prescriptions for the practice.
