

Important Content Update Message

We are currently updating the OP Help Center content for OP 20. We appreciate your patience as we continue to make these updates. To locate the version of your software, navigate to: **Help tab > About**

Promoting Interoperability (MU Stage 3) Learning Resource

Last Modified on 11/17/2020 3:10 pm EST

Welcome to Promoting Interoperability (MU Stage 3) Learning Resource

For practices participating in the Medicaid EHR Incentive Program in 2020, the EP (Eligible Provider) must use Certified Health Record Technology (CEHRT), meet performance for the Objectives and Measures and report performance on a set of Clinical Quality Measures (CQMs).

In 2019 Office Practicum delivered OP 20, our 2015 Edition certified version. This includes our partnering with CQMsolution, who specialized in development and maintenance of Clinical Quality Measures and IntelliChart for the new OP Patient Portal.

Familiarize Yourself

In preparation for the reporting period, you need to review the following:

- [Review and understand the Medicaid Promoting Interoperability Program for Objective and Measures for 2020](#)
- [QIC Reporting in OP](#)
- [IntelliChart ONC 2015 Report Logic - Workflow](#)
- [IntelliChart ONC 2015 Stage 3 ACI Details Report](#)

Note: The IntelliChart Open API provides a set of methods for retrieval integration with the IntelliChart HIE. Access to the API requires authentication with the IntelliChart Open API Authorization server in order to obtain the requisite token. For detailed information for IntelliChart API, click [here](#).

Preparing and Reporting CQMs

In preparation for CQM reporting, you will need to update your database LOINC codes for diagnostic tests including lab tests, x-rays, ultrasounds and other procedures. In addition, Taxonomy codes for the specialist to whom you refer patients will need to be assigned.

- [CQM Preparation](#)
- [Using the CQMsolution Portal for eCQMs](#)
- [CQM Calculations](#)

Meeting the Measures

- [Determine Medicaid Volume](#)
- [Objective 1: Protect Patient Health Information \(Attest\)](#)
- [Objective 2: Electronic Prescribing](#)
- [Objective 3: Clinical Decision Support \(Attest\)](#)
- [Objective 4: Computerized Provider Order Entry \(CPOE\)](#)
- [Objective 5: Patient Electronic Access to Health Information \(IntelliChart\)](#)
 - [Objective 5/Measure 2 Workflow: Patient Specific Educational Resources](#)

- Objective 6: Coordination of Care Through Patient Engagement (InteliChart)
- Objective 7: Health Information Exchange
- Objective 8: Public Health and Clinical Data Registry Reporting (Attest)
