About

This is an OP-collated list of commonly-used LOINC codes for in-house pediatric tests.

Caveats

Please note:

- LOINC codes change from time to time, and so this list may not contain the most recent updates. You may reference the master list by creating a free account at [LOINC.org](https://loinc.org).
- Sometimes one type of test may have several different methods by which the test is performed. For example, a “strep test” might refer to a rapid EIA strep test, a molecular strep test, or a strep throat culture. We have tried to specify which method is associated with a particular LOINC code.
- Because OP cannot know which particular lab test each practice uses, choosing the correct LOINC must be done by the practice. If you’re not sure which method your in-house lab uses, consult your medical director or lab director. Reviewing the package insert of your lab supplies may sometimes be useful.

In-House LOINC Codes

Tip: Java must be enabled in order to use the search and sort capability. To quickly find the video you want in this table:

- **Filter:** Enter specific keywords (or a character string) in the filter bar. As you enter characters in the filter bar, the rows not containing those characters will become hidden. The visible rows display based upon the characters in the row that match the characters in the filter bar. The more characters you enter, the more the table will be filtered. Please only use keywords and correct spelling. You can use letters and numbers. **Do not use commas to separate keywords.**
- **Sort:** You can sort A - Z and Z - A by clicking on a column header.
