# Can a parent print their child's vaccine record from the portal?

Last Modified on 08/04/2020 8:25 am EDT

Yes. Immunization records can be printed from the portal. They do not have to be requested or manually sent, but rather are considered clinical data and are automatically pushed to the portal. The parent will take these steps to access and print their child's vaccine record:

1. Log into the portal and select the **patient's toggle** button.
2. In the Navigation Panel, expand **My Chart** and select **Immunizations**.
3. In the Immunizations section of the window, click the **Print** button.
4. In the print window, click **Print This Page**.
