

SQL: Primary Contact Information

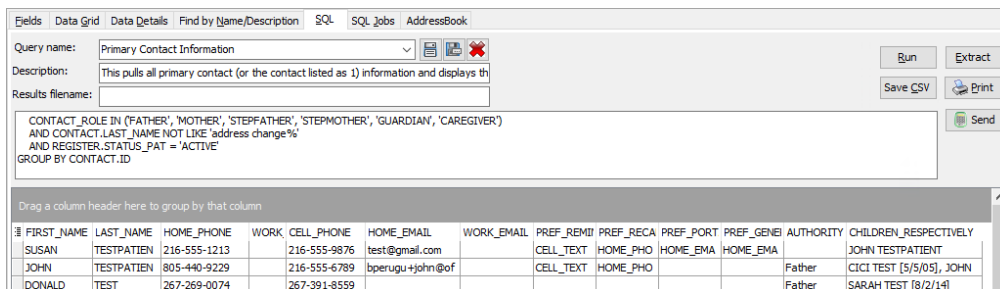

Last Modified on 02/23/2022 9:46 am EST

i There are **two versions** of this SQL: Firebird and MySQL. The **MySQL version** only applies to clients who are **BETA testing MySQL**. All other Practices should continue to use the Firebird version of this code. Click to expand and copy the code you need. If you are unsure which code to use, please check with your Practice Administrator.

About

This report displays all primary Family Contacts (or Family Contacts with a sort of 1) and their information as entered into OP. Because parents can be associated with multiple children, the Authority and Children_Respectively fields are concatenated and list out the contact's authority with each specific child.

A sample image of this SQL report run in the Database Viewer is shown below:

Query name: Primary Contact Information
 Description: This pulls all primary contact (or the contact listed as 1) information and displays th
 Results filename:

```
CONTACT_ROLE IN ('FATHER', 'MOTHER', 'STEPFATHER', 'STEPMOTHER', 'GUARDIAN', 'CAREGIVER')
AND CONTACT.LAST_NAME NOT LIKE 'address change%'
AND REGISTER.STATUS_PAT = 'ACTIVE'
GROUP BY CONTACT.ID
```

FIRST_NAME	LAST_NAME	HOME_PHONE	WORK	CELL_PHONE	HOME_EMAIL	WORK_EMAIL	PREF_REMI!	PREF_RECA	PREF_PORT	PREF_GENE!	AUTHORITY	CHILDREN_RESPECTIVELY
SUSAN	TESTPATIEN	216-555-1213		216-555-9876	test@gmail.com		CELL_TEXT	HOME_PHO	HOME_EMA	HOME_EMA		JOHN TESTPATIENT
JOHN	TESTPATIEN	805-440-9229		216-555-6789	bperugu+john@of		CELL_TEXT	HOME_PHO			Father	CICI TEST [5/5/05], JOHN
DONALD	TEST	267-269-0074		267-391-8559							Father	SARAH TEST [8/2/14]

Caveats

- This report simply displays information as it has been entered into OP. It does not verify the validity of the information.
- Each column can be filtered to display (BLANKS) to easily identify missing information.
- Blank fields indicate that the Contact record does not have an entry for that particular data item.

SQL Code: Firebird

To highlight and copy the code below to your clipboard, simply click the **Copy** button.

Copy

```
select MAX(CONTACT.FIRST_NAME) AS FIRST_NAME, MAX(CONTACT.LAST_NAME) AS LAST_NAME, MAX(CONTACT.HOME_PHONE) AS HOME_PHONE, MAX(CONTACT.WORK_PHONE) AS WORK_PHONE,
