

Tracked-Time Code Calculation

Last Modified on 12/27/2021 3:09 pm EST

Version 20.10

About

The Tracked Time is displayed alongside the MDM calculation in the Coding section of the Encounter Note, giving you the opportunity to decide which coding method you will use for the Encounter. The categories of tracked-time are presented with their respective minutes/seconds breakdown **according to your practice's global setting**. They are added up and displayed as **Total Time**, which is also used to determine the **CPT code suggestion**. To learn how to code and finalize your Encounter Note, click [here](#).

Per CMS, the E/M Codes used for Time-Tracked visits are as follows:

Established Patients

Codes are based on **total time spent on the date of the Encounter**.

99212	99213	99214	99215
10-19 minutes	20-29 minutes	30-39 minutes	40-54 minutes

For services 55 minutes or longer, refer to the Prolonged Services codes.

New Patients

Codes are based on **total time spent on the date of the Encounter**.

99202	99203	99204	99205
15-29 minutes	30-44 minutes	45-59 minutes	60-74 minutes

99201 has been deleted. If you are spending less than 15 minutes with a new patient, we recommend using MDM-based E/M Coding.

For services 75 minutes or longer, refer to the Prolonged Services codes.
