

# COVID-19 Vaccine Information

Last Modified on 11/15/2022 2:16 pm EST

Version 20.17

## COVID-19 Vaccine Product List

The Vaccine Products below are available in OP. Future Products that have not yet been added to OP, including the new bivalent COVID Vaccine, can be found [here](#).

**Important:**

- COVID-19 vaccines have been added to VacLogic+; this includes the administration of a booster or high-risk dose.
- The Immunizations Forecast window has been updated to include a COVID19 group panel.
- The ability to change the expiration date on COVID-19 vaccine lots where the vaccine was administered to patients has been added.
- Each vaccine product and dose will have its own unique vaccine administration code, and OP will automatically add the administration code according to the COVID vaccine documented. **Caveat:** If you have Insurance Payers set up to not send immunization admin codes on claims, these will also not be sent.
- Some EUA (Emergency Use Authorization) fact sheets are available in OP. If not available, the practice can input into the **Immunization Codes > Vaccine Information Sheet** table. Once the EUA is added by OP, the Practice will need to archive the manually added EUA.
- If your Practice receives a COVID vaccine that is not yet available in the Vaccine Codes table, the Practice is responsible for input. Once the COVID vaccines are added by OP into the Vaccine Codes table, archive the manually added vaccine.
- OP does not have COVID vaccine templates, at this time. The Practice may create a template using the Copy feature in the Template Editor or use the template available for Shot Only Visits.
- COVID-19 vaccines currently do not show on School/Camp forms. If needed, it is suggested you print the Immunizations Complete List. This improvement will be coming in a future release.
- If your Practice has questions about the vaccine registry and OP, please contact your state registry.

OP Vaccine Name	OP Inventory Name	Manufacturer Code	Description	CVX Code	CPT Code										
COVID19 100	COV2-MOD	MOD	SARS-COV-2 (COVID-19) vaccine, mRNA, spike protein, LNP, preservative-free, 100 mcg/0.5mL dose	207	91301

<b>COVID19 UNKNOWN*</b>	COV2-NOS		SARS-COV-2 (COVID-19) vaccine, UNSPECIFIED	213							

\* The COVID19 UNKNOWN should not be used for the administration of vaccines. This entry is to be used for historic input and will not be supported for dosing and immunization administration login.

### Additional Booster Administration Codes

Code	Short Description Long Description	Manufacturer
0004A	ADM SARSCOV2 30MCG/0.3ML BST IMM ADMIN, IM SARS-CoV-2 [COVID-19], mRNA-LNP, spike prot, PF, 30mcg/0.3mL, diluent recons; booster	PFR
0054A	ADM SARSCV2 30MCG TRS-SUCR B IMM ADMIN, IM SARS-CoV-2 [COVID-19], mRNA-LNP, spike prot, PF, 30mcg/0.3mL, trissucrose; booster	PFR
0034A	IMM ADMIN, COVID19 JANSSEN, BOOSTER IMM ADMIN, IM SARS-CoV-2 [COVID-19] , DNA, spike prot, Ad26 vect, PF, 5x1010 vial part/0.5mL, booster	JSN

Version 20.16

**Important:** Practices that had previously added the COVID-19 vaccine as 5-12, the vaccine was documented incorrectly and should have been 5-11. Any templates you have created for COVID vaccines should be reviewed and modified to the correct vaccine.

### COVID-19 Vaccine Product List

The Vaccine Products below are available in OP.

**Important:**

- COVID-19 vaccines have been added to VacLogic; this includes the administration of a booster or high-risk dose.
- The Immunizations Forecast window has been updated to include a COVID19 group panel.
- The ability to change the expiration date on COVID-19 vaccine lots where the vaccine was administered to patients has been added.
- Each vaccine product and dose will have its own unique vaccine administration code, and OP will automatically add the administration code according to the COVID vaccine documented. **Caveat:** If you have Insurance Payers set up to not send immunization admin codes on claims, these will also not be sent.
- Some EUA (Emergency Use Authorization) fact sheets are available in OP. If not available, the practice can input into the **Immunization Codes > Vaccine Information Sheets** table. Once the EUA is added by OP, the Practice will need to archive the manually added EUA.
- If your Practice receives a COVID vaccine that is not yet available in the Vaccine Codes table, the Practice is responsible for input. Once the COVID vaccines are added by OP into the Vaccine Codes table, archive the manually added vaccine.
- OP does not have COVID vaccine templates, at this time. The Practice may create a template using the Copy feature in the Template Editor or use the template available for Shot Only Visits.
- COVID-19 vaccines currently do not show on School/Camp forms. If needed, it is suggested you print the Immunizations Complete List. This improvement will be coming in a future release.
- If your Practice has questions about the vaccine registry and OP, please contact your state registry.
