Caveats

If you want to add another medication like Privacillin, you can modify the SQL by adding a line, for example:

```
(prescrib like '%(21)%'  
or lower(prescrib) like '%privacillin%'  
or prescrib like '%(28)%'
```

The above will find upper and lower and mixed case spellings of Privacillin. Any medication name you add will need to include a single quote and a percent (%) sign at the beginning and end of the medication name.
