

2022-2023 Flu Vaccine Product Information

Last Modified on 09/15/2022 8:33 am EDT

Version 20.17

 The 2022-2023 Flu Vaccine Products are available as of the release of OP 20.17.17. If you need to add them into OP prior to your update to that build, see [Add a Vaccine to the Vaccine Codes Table](#)

The CDC has not yet published an updated 2022-2023 Flu VIS. At this time, they recommend continuing to use the [Vaccine Information Statement Inactivated Influenza Vaccine dated 8/6/2021](#). To be notified by the CDC when this is updated, subscribe to get their email updates [here](#).

Note: Practices have up to **6 months** to use the prior version. OP will add the new VIS Barcode version with an OP update **as soon as feasible** after it's released. In the meantime, you can **add it on your own**

Active Flu Vaccine List for 2022-2023

Notes:

- Filter:** Enter specific keywords or a character string in the Filter field. As you type, the table is updated to display only rows that match what you've typed. The more characters you enter, the more the table will be filtered. Only use keywords, correct spelling, letters, and numbers. **Do not use commas to separate keywords**
- Sort:** You can sort A - Z and Z - A by clicking on a column header.

Java must be enabled in order to use the search and sort capability.
