

SQL: Invalid Phone Fields: Staff Directory

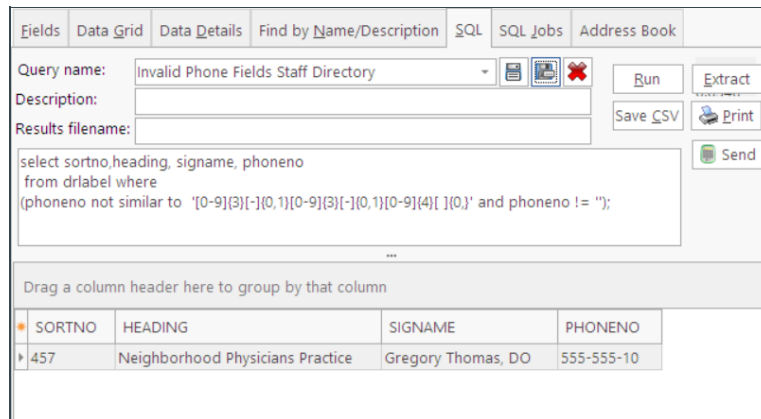

Last Modified on 09/06/2022 10:02 am EDT

i There are **two versions** of this SQL: Firebird and MySQL. The **MySQL version** only applies to clients who are **BETA testing MySQL**. All other Practices should continue to use the Firebird version of this code. Click to expand and copy the code you need. If you are unsure which code to use, please check with your Practice Administrator.

About

This report shows phone numbers found in Staff Directory that contain something other than 10 numeric values. After running this SQL, navigate to the Staff Directory for each user to update their phone number(s): **Practice Management tab > Staff/Providers > select Staff Member or Provider > Practice Info**.

A sample image of this SQL report run in the Database Viewer is shown below.

The screenshot shows a Database Viewer interface with a query editor and a results table. The query editor contains the following SQL code:

```
select sortno, heading, signame, phoneno
from dlabel where
(phoneno not similar to '[0-9]{3}[0,1]{0,1}[0-9]{3}[0,1]{0,1}[0-9]{4}[0,1]{0,1}');
```

The results table displays the following data:

SORTNO	HEADING	SIGNAME	PHONENO
457	Neighborhood Physicians Practice	Gregory Thomas, DO	555-555-10

[+ SQL Code: Firebird](#)
