

SQL: Invalid Phone Fields: Practice

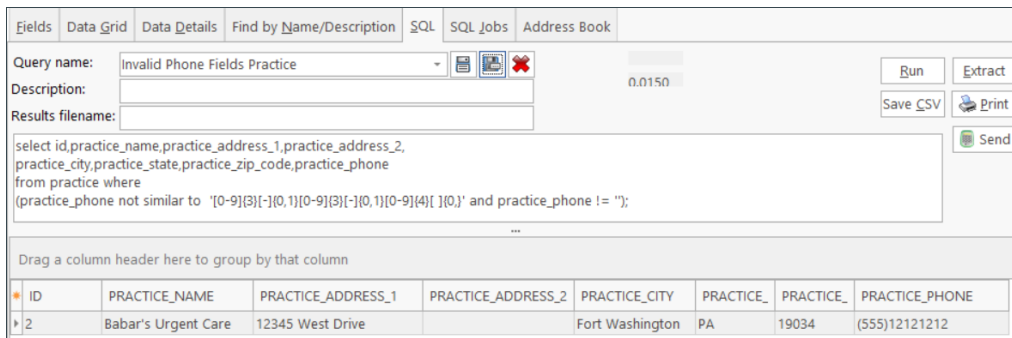

Last Modified on 09/06/2022 10:02 am EDT

i There are **two versions** of this SQL: Firebird and MySQL. The **MySQL version** only applies to clients who are **BETA testing MySQL**. All other Practices should continue to use the Firebird version of this code. Click to expand and copy the code you need. If you are unsure which code to use, please check with your Practice Administrator.

About

This report shows phone numbers found in the Practices table that contain something other than 10 numeric values. After running this SQL, navigate to the Practices table to update the phone number(s): **Practice Management tab > Practices/Locations > Practices tab > select Practice**.

A sample image of this SQL report run in the Database Viewer is shown below:

The screenshot shows a Database Viewer interface with a query editor and a results table. The query editor contains the following SQL code:

```
select id,practice_name,practice_address_1,practice_address_2,
practice_city,practice_state,practice_zip_code,practice_phone
from practice where
(practice_phone not similar to '[0-9]{3}[-][0,1]{0-9}{3}[-][0,1]{0-9}{4}[ ]{0,}') and practice_phone != '';
```

The results table below the query editor displays the following data:

ID	PRACTICE_NAME	PRACTICE_ADDRESS_1	PRACTICE_ADDRESS_2	PRACTICE_CITY	PRACTICE_STATE	PRACTICE_ZIP_CODE	PRACTICE_PHONE
2	Babar's Urgent Care	12345 West Drive		Fort Washington	PA	19034	(555)12121212
