

SQL: Invalid Phone Fields: Active Patients Only

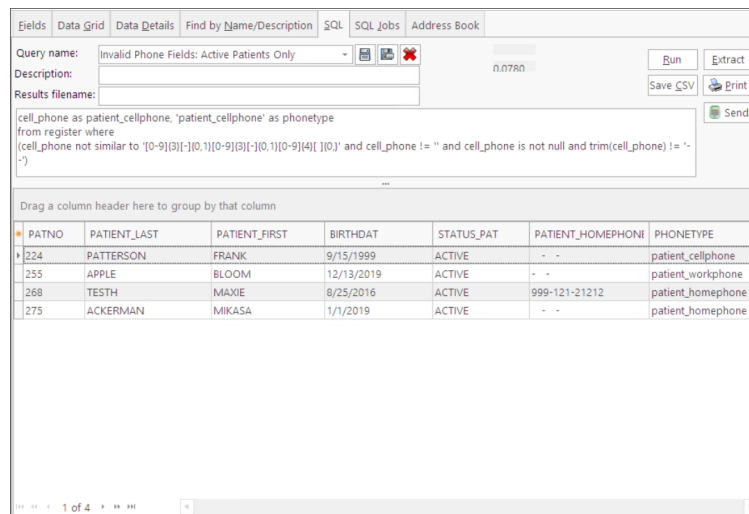

Last Modified on 09/01/2023 4:52 pm EDT

i There are **two versions** of this SQL: Firebird and MySQL. **The MySQL version only applies to clients who are BETA testing MySQL.** All other Practices should continue to use the Firebird version of this code. Click to expand and copy the code you need. If you are unsure which code to use, please check with your Practice Administrator.

About

This SQL shows any malformed phone number associated with an active patient in the Basic Information window.

A sample image of this SQL report run in the Database Viewer is shown below:

PATNO	PATIENT_LAST	PATIENT_FIRST	BIRTHDAT	STATUS_PAT	PATIENT_HOMEPHONE	PHONETYPE
224	PATTERSON	FRANK	9/15/1999	ACTIVE	- -	patient_cellphone
255	APPLE	BLOOM	12/13/2019	ACTIVE	- -	patient_workphone
268	TESTH	MAXIE	8/25/2016	ACTIVE	999-121-21212	patient_homephone
275	ACKERMAN	MIKASA	1/1/2019	ACTIVE	- -	patient_homephone

Caveats

Only malformed numbers (i.e. not 10 numeric digits) attached in a patient's chart are shown.

Only active patients are searched. To search all patient records for malformed numbers, see [SQL: Invalid Phone Fields: Basic Information](#).
