

SQL: Invalid Phone Fields: Active Payers Only

Last Modified on 09/01/2023 4:52 pm EDT

 There are **two versions** of this SQL: Firebird and MySQL. **The MySQL version only applies to clients who are BETA testing MySQL.** All other Practices should continue to use the Firebird version of this code. Click to expand and copy the code you need. If you are unsure which code to use, please check with your Practice Administrator.

About

This SQL identifies malformed phone numbers in active payer records. Malformed phone numbers are those that are not exactly 10 numeric digits.
