Path: Admin > Audit Trail

About

A record of an alert being created, modified, or deleted from OP can be seen on the Audit Trail of Changes to Records tab in the Audit Trail.

Auditing of Creating an Alert

When creating a new alert the audit log will show a Record Creation for Patient Alerts. The before changes will be empty and the alert details in the after changes:

Date	Staff Name	Patient ID	Table Changed	Reason	Before Changes	After Changes
05/19/2023 04:03 PM	5555PERRY COX	181	PATIENTALERT	RECORD CREATION		id: 0 patno: 181 alertName: Scan Insurance Card alertDetails: Scan new insurance card at patient's next appointment departmentIdList: 101 alertOccurrence: 11 startDate: 2023-05-17T16:02:29 endDate: null createdBy: 5555 createdDate: 2023-05-19T16:03:46.370928625 lastUpdatedBy: null lastUpdatedDate: null

Auditing of Updating an Alert

When updating an alert the audit log will show a Record Update for Patient Alerts. The before changes will show the information prior to the updates and the changes will be reflected in the after changes:

Date	Staff Name	Patient ID	Table Changed	Reason	Before Changes	After Changes
05/19/2023 04:06 PM	5555PERRY COX	181	PATIENTALERT	RECORD UPDATE	id: 43 patno: 181 alertName: Scan Insurance Card alertDetails: Scan new insurance card at patient's next appointment departmentIdList: 101 alertOccurrence: 11 startDate: 2023-05-17T16:02:29 endDate: null createdBy: 5555 createdDate: 2023-05-19T16:03:46.370	id: 43 patno: 181 alertName: Scan Insurance Card 2023 alertDetails: Please Scan the 2023 insurance card at patient's next appointment departmentIdList: 101 alertOccurrence: 11 startDate: 2023-05-17T16:02:29 endDate: null createdBy: 5555 createdDate: 2023-05-19T16:03:46.370 lastUpdatedBy: 5555 lastUpdatedDate: 2023-05-19T16:06:04.390721283

Auditing of Deleting an Alert

When deleting an alert the audit log will show a Record Delete for Patient Alerts. The before changes will show the alert information and the after changes will be empty.
