VIS Links in the Patient Education Library

Links to current editions of Vaccine Information Sheets (VIS) or Immunization Information Sheets (IIS) in both English and Spanish can be placed in the Patient Education Library, organized under the source OTH (Other). These links can be utilized as resources in well check templates or in specific shot-only visit nursing templates. If you would like to add or edit the VIS section of your practice's Patient Education library, all required information for each of the available VIS can be found in the below PDF document.

Please note any name changes from existing VIS entries in the patient education library, which your practice may or may not have already addressed.

You will want to review your existing templates to confirm that any VIS listed in the **Orders/Workflow** section, **Resources** tab, match to current entries in your Patient Education library.
