

# Webinar Recording: Practice Analytics (Presented May 9, 2024)

Last Modified on 05/09/2024 4:19 pm EDT

 [Slide Deck](#)

The Practice Analytics module offers a collection of reports and dashboards to make information easier to read and more interactive. You can now find a visual summary at the beginning of most reports to easily make sense of the information presented by them. Features like drilling down and applying filters are a couple of clicks away. You can interact with the information to focus on specific indicators and then export the result or save your changes without altering the original report using bookmarks. View a [comparison chart](#) of the new Practice Analytics reports vs. the Billing Reports.
