Immunization Complete List Map

Number	Section	Description
1	New	Shows the New Vaccine window to enter the immunization information and create a new record.
2	Edit	Shows the Edit Vaccine window to modify the immunization information of the selected record. Selected records are marked by a caret $ ightarrow$ to their left.
3	Delete	Deletes the selected record. Selected records are marked by a caret 🕨 to their left.
4	Refuse/Defer	Shows the Refuse/Defer window to enter information to refuse or defer the selected immunization record. Selected records are marked by a caret $ ightharpoondown$ to their left.
5	Requeue	Retries the transmissions marked as warning or error to the next transmission for the selected immunization record. Selected records are marked by a caret $ ightharpoondown$ to their left.
6	Expand grid	Indicates whether to expand grid?

7	Registry Status Key	 Shows the possible status icons and their meaning in theRegistry Status column: Message Accepted : Indicates that the registry received and accepted all data components associated with the transmitted immunization record. Received with warning A : Indicates that the registry received and accepted the immunization record that was transmitted, however it identified one or more invalid data components associated with the record. Action to correct the rejected data components is optional. Received with errors : Indicates that the registry received and likely did not accept the immunization record that was transmitted due to one or more data components associated to the record failing a core requirement by the registry. Action to correct the rejected data components is required to ensure that the registry consumes the immunization record successfully. Requeuing to Registry : Indicates that the registry is being retransmitted to correct rejected data components.
		By clicking on any of the icons described above, a modal will pop up for the OP user allowing a preview of the acknowledgement that was received back from the registry. Upon clicking the Show HL7 button in bottom right corner of the modal, the full details of the response returned by the registry for each time the record has been transmitted will be displayed to the user.
