21.4 Release Rollout is Underway!

Last Modified on 11/08/2024 9:22 am EST

We're thrilled to announce that the OP**21.4** release rollout is underway!

Here's a summary of the exciting changes and enhancements coming with our latest major update:

- **Schedule Calendar** with new layout, colors, and features
- Improved Functionalities across the platform
- Performance Enhancements
- Issue Resolutions

In preparation, keep an eye out for the release communication and, if you're not already reaping the benefits of the new **Calendar**, we recommend enabling it prior to the release. For those who don't turn it on manually, the new**Calendar** will be automatically enabled in **21.4**.

For full details on everything this release offers, please refer to our Release Notes.
